## ROSTER OF ASTRONOMY DEPARTMENTS WITH ENROLLMENT AND DEGREE DATA, 1994.

This roster contains detailed data from the annual Survey of Enrollments and Degrees. The survey was conducted during the 1994-95 academic year and consists of all degree-granting astronomy departments in the United States. Presented in this roster are the data for the 1993-94 degrees and the 1994-95 enrollments.

The enrollment data are presented at three levels: introductory, undergraduate and graduate. The introductory enrollment figures represent the number of students who were taking their first college/university astronomy course. The undergraduate enrollments include students at the junior and senior level. Seniors, when identified by their department as beyond their fourth full-time year of undergraduate study, are categorized separately from fourth year seniors. Data on total graduate student enrollment, as well as the number of foreign and first year students included in that total, are given for departments that offer graduate degrees.

Degrees at all levels are shown in the right hand column. The masters degrees are split into two types: MASTERS indicates degree recipients who discontinued their study of astronomy at that department and MASTERS ENROUTE indicates students who are continuing toward their doctorate in their current department. Degree recipients in the former category may continue astronomy graduate study at another institution.

There are 68 degree-granting astronomy departments, all of which responded to the survey. Of these departments, 32 are combined with the physics department at the same university. The remaining 36 departments are administered separately from the physics department.

**Notations used in this roster:**

- c** Combined astronomy and physics department. (N=32)
- s** Separate astronomy department. (N=36)
- m** Department grants a masters as its highest astronomy degree. (N=4)
- p** Department grants a PhD as its highest astronomy degree. (N=40)
- GRADUATE DEPT ONLY** Department has no undergraduate program in astronomy. (N=9)
- MASTERS** This column includes both masters degrees from masters-granting departments and masters degrees from doctorate departments whose students are leaving that department.
- MASTERS ENROUTE** This column contains masters degrees from doctorate-granting departments for students continuing onto their PhD in the same department.
- Data for this field were not provided.

The totals presented in the following table represent the data from all 68 degree-granting astronomy departments.

Highest degree offered	1994 - 95 Astronomy Enrollments						1993 - 94 Astronomy Degrees			
	Undergraduate Students			Graduate Students			Bach	Masters	Masters Enroute	PhD
