PhD'S

PHYSICISTS MATHEMATICIANS ENGINEERS, EE

Research-minded individuals with high qualifications and keen interest in communications theory are invited to review the scope of the studies described below with a representative of

SYLVANIA'S AMHERST LABORATORY (in beautiful suburban Buffalo)

PROBABILITY AND INFORMATION THEORY

Studies in broad field of probability theory and its application to information theory. Aimed at advancing the state of the art in communications.

Ph.D. in mathematics, theoretical statistics or information theory with strong mathematical background.

ELECTROMAGNETIC PROPAGATION

Experimental and theoretical research in electromagnetic propagation as related to new concepts and developments in the means and techniques of communications.

Ph.D. in physics or electrical engineering regarded as essential.

Candidates for these positions will work with a minimum of supervision

There are also a few positions open at Sylvania's Amherst Laboratory for SPECIALISTS IN COMMUNICATIONS SYSTEMS & SPECIAL CIRCUITS.

While a Ph.D. is desirable, it is not essential.

The Amherst Laboratory is now working with other laboratories in Sylvania's Electronic Systems Division on "Plato"—an AMM system to counter IRBM's.
