

Operations Research Scientist

\$13,000 to \$16,000

■ A major corporation with operations near Los Angeles and near New York, has an excellent senior level position open in its Operations Research Staff. Vacation, company-paid medical and life insurance, working conditions, and other benefits are among the best in the nation.

■ The position requires strong ability in system analysis and synthesis with experience in military systems and/or equipment desirable. Familiarity with military electronic equipment such as displays, data processing and communications equipment and some knowledge of modern weapons and their employment is also needed.

■ Those interested in considering this position should have a Master's degree (Ph.D. desirable) and at least five years' experience in above or related fields. Training and experience should be recent with interest shown in keeping abreast of new developments in operations research, linear programming, game theory and/or theory of communications, information and noise.

■ Inquiries will be considered in confidence. You are invited to send your resume to

Societies

Optical Society of America

THE Soviet journal *Optika i Spektroskopiia* is now being translated on a regular basis and distributed (together with the *Journal of the Optical Society of America*) to all members of the Optical Society. Under a grant to the Society from the National Science Foundation, the translation from Russian into English is being done by Morris D. Friedman, Inc., and the translated journal is printed for the OSA by the Blackburn Printing Co., Concord, Mass., under the title *Optics and Spectroscopy*.

The original journal, which is a publication of the Soviet Academy of Sciences, is edited by S. E. Frish and is now in its sixth year. The first issue to appear in English translation is that of January 1959 (Vol. VI, No. 1). The two publications, *Optics and Spectroscopy* and the *Journal of the Optical Society of America*, are available only as a unit. The nonmember subscription price for both is \$25 in the United States and Canada and \$28 elsewhere. All nonmember subscription orders should be sent to the American Institute of Physics, 335 East 45th Street, New York 17, N. Y. Inquiries concerning membership in the Society may be sent to the OSA's secretary, Dr. K. S. Gibson, National Bureau of Standards, Washington 25, D. C.

Society of Rheology

PAPERS presented at the Society of Rheology's 1957 annual meeting have been collected and published as Volume II of the *Transactions of the Society of Rheology*, under the editorship of R. D. Andrews of the Massachusetts Institute of Technology. Fifteen papers from the technical program are printed in full, and abstracts of other papers presented at the meeting are included. The volume is available for \$8.50 from the publisher (Interscience Publishers, Inc., 250 Fifth Avenue, New York 1, N. Y.). Volume I of the *Transactions*, containing papers presented at the 1956 annual meeting, is still available from Interscience at a price of \$6 per copy.

Collections of papers given at earlier annual meetings of the Society were published in journals (notably the *Journal of Colloid Science* and the *Journal of Applied Physics*). In order to provide a consistent archival form for the publication of rheological papers, the Society decided in 1957 to establish the *Transactions*, and it is intended that they shall appear annually.
