

JARRELL-ASH MICROFOCUS X-RAY UNIT

Features

BETTER FOR . . .

- High Resolution
- Low Angle Studies
- High Speed
- Microradiography
- Lattice Defect Studies
- Microsamples

The Jarrell-Ash Microfocus X-Ray unit is the best instrument for all photographic diffraction work. It is manufactured in the U.S.A. exclusively by Jarrell-Ash Co.*

Calendar

Material for inclusion in the calendar and meeting sections should be received 6 weeks prior to the date of the issue in which it is to appear. Further information can be obtained by writing to the addresses indicated in parentheses.

October

- 9-13 The Electrochem. Soc., Shamrock Hotel, Houston, Tex. (*Electrochem. Soc.*, 1860 Broadway, New York 23, N. Y.)
- 10-12 Nat'l Electronics Conf., Hotel Sherman, Chicago (NEC, 228 N. La Salle St., Chicago 1, Ill.)
- 11-14 Inelastic Scattering of Neutrons in Solids & Liquids, IAEA symp., Vienna (IAEA, 11 Kärntner Ring, Vienna 1, Austria)
- 12-14 Optical Society of America, Somerset Hotel, Boston, Mass. (See Aug. PT, p. 61) (Mary Wurga, 1155 16th St., N. W., Washington 6, D. C.)
- 12-14 Gaseous Electronics Conf. spon's'd by APS Div. of Electron Physics & US Naval Postgraduate School at US Naval Postgraduate School, Monterey (N. L. Oleson, US Naval Postgraduate School, Monterey, Calif.)
- 12-14 Astronautics Symp. spon's'd by AFOSR & SAE, Ambassador Hotel, Los Angeles (See Sept. PT, p. 75) (W. F. Ballhaus, Nortronics Div., Northrop Corp., Hawthorne, Calif.)
- 12-14 Am. Vacuum Soc. symp., Cleveland-Sheraton Hotel, Cleveland, Ohio (AVS, Box 1282, Boston 9, Mass.)
- 16-22 High-Speed Photography, internat'l SMPTE congress & exhibition, Sheraton-Park Hotel, Washington, D. C. (M. Beard, NOL, 10703 E. Nolcrest Dr., Silver Spring, Md.)
- 17-19 NAS-NRC Electrical Insulation Conf., Nat'l Bureau of Standards, Washington, D. C. (P. J. Franklin, Diamond Ordnance Fuze Lab, Washington, D. C.)
- 17-21 Neutron Pile Research, IAEA symp., Vienna (IAEA, 11 Kärntner Ring, Vienna 1, Austria)
- 19-26 Internat'l Congress & Exhibition for Instrumentation & Automation (INTERKAMA), Düsseldorf (Nordwestdeutsche Ausstellungs Gesellschaft, Ehrenhof 4, Düsseldorf, Germany)
- 20-21 Hypervelocity Techniques Symp., Denver Research Inst., Denver, Colo. (J. B. Bidwell, Inst. of The Aeronautical Sciences, 2 E. 64 St., New York 21, N. Y.)
- 20-22 Acoustical Society of America, Sheraton-Palace Hotel, San Francisco (V. Salmon, Stanford Research Inst., Menlo Park, Calif.)
- 21 Advances in Tracer Methodology Symp. spon's'd by Baird-Atomic & New England Nuclear Corp., Conrad Hilton Hotel, Chicago, Ill. (Baird-Atomic, Inc., 33 University Rd., Cambridge 38, Mass.)
- 22 APS & AAPT New England Sections, joint mtg., U. of New Hampshire, Durham (P. J. Bray, Brown U., Providence 12, R. I.)
- 22 AAPT Northern Calif. Sect., U. of Calif. Radiation Lab, Livermore (Helen Pillans, Mills Col., Berkeley, Calif.)

- 22 Midwest Solid-State Conf., ann., U. of Nebr., Lincoln (J. W. Weymouth, U. of Nebr., Lincoln 3, Nebr.)
- 23-26 Rare Earth Research Seminar spon's'd by U. of Calif., Dept. of Defense, & Research Chemicals, at Lake Arrowhead, facilities limited (See Sept. PT, p. 75) (E. V. Kleber, Research Chemicals, Burbank, Calif.)
- 24-26 Medical & Biological Aspects of Energies of Space, internat'l symp., spon's'd by AF School of Aviation Medicine, at Hilton Hotel, San Antonio (See Aug. PT, p. 61) (J. Harmon, Southwest Research Inst., Box 2296, San Antonio 6, Tex.)
- 24-27 Chemical Effects of Nuclear Transformation, IAEA symp., Prague, Czechoslovakia (See May PT, p. 70) (IAEA, 11 Kärntner Ring, Vienna 1, Austria)
- 26-27 Computer Applications Symp. spon's'd by Armour Research Found., Morrison Hotel, Chicago (A. Ungar, ARF, 10 W. 35 St., Chicago 16, Ill.)
- 26-28 Nonlinear Magnetics & Magnetic Amplifiers Conf., Bellevue-Stratford Hotel, Philadelphia, Pa. (D. Katz, Bell Telephone Labs, Whippany, N. J.)
- 27-28 Electron Devices Mtg. spon's'd by IRE PGED, Shoreham Hotel, Washington, D. C. (H. W. Welch, Jr., Motorola, Inc., 8201 E. McDowell Rd., Scottsdale, Ariz.)
- 28-29 APS Ohio Section, Ohio State U., Columbus (L. E. Smith, Denison U., Granville, Ohio)
- 31-2 Society of Rheology, Mellon Inst., Pittsburgh, Pa. (W. R. Willets, Titanium Pigment Corp., 99 Hudson St., New York 13, N. Y.)
- 31-2 Electrical Techniques in Medicine & Biology, Sheraton-Park Hotel, Washington, D. C. (See May PT, p. 73) (G. N. Webb, Room 547-CSB, Johns Hopkins Hospital, Baltimore 5, Md.)

November

- 2-4 APS Division of Plasma Physics, 2nd ann. mtg., Gatlinburg (See Sept. PT, p. 75) (A. H. Snell, Oak Ridge Nat'l Lab, Oak Ridge, Tenn.)
- 4-5 APS New York State Section, mtg. on Modern Advances in Physical Computing Systems, Harpur Col., Endicott (O. E. Miller, Bldg. 65, 1669 Lake Ave., Rochester 4, N. Y.)
- 7-9 Molecular Structure & Organic Reactions, Robt. A. Welch Found. Conf., The Rice Hotel, Houston (W. O. Milligan, c/o P. O. Box 1892, Houston 1, Tex.)
- 7-10 Soc. of Exploration Geophysicists, ann. mtg., Moody Convention Center, Galveston (W. B. Lee, Jr., Gulf Oil Corp., Drawer 2100, Houston 1, Tex.)
- 9-11 Pittsburgh Diffraction Conf., Mellon Inst. (See July PT, p. 74) (L. F. Vassamillet, Mellon Inst., 4400 Fifth Ave., Pittsburgh 13, Pa.)

Solid State

Physicists ...an invitation to consider

THEORETICAL AND EXPERIMENTAL INVESTIGATIONS at the Research Division of STROMBERG-CARLSON

Physicists enjoy the freedom of an academic environment at Stromberg-Carlson's Research Division. Programs are of sufficient breadth as to allow the investigator wide latitude in choice of research.

A sampling of the areas under exploration involves these studies:

- ...relation of various crystal structures to spin levels
- ...interaction between lattice vibrations and micro-waves
- ...methods and techniques for preparing semiconductor materials
- ...electrical properties of semiconductor materials
- ...charge transport in semiconducting films and switching mechanism in magnetic films

Research in the commencement stage or proposed for the immediate future involves:

- ...theory of many-particle interaction
- ...defect solid state
- ...nucleation and growth of crystals
- ...cryogenics, emphasizing thermal and electrical properties of matter near absolute zero

If you would like to discuss your field of interest with the head of this research group, write informally to Mr. Maurice Downey. Background at the doctoral level or equivalent is prerequisite to a staff appointment.

STROMBERG-CARLSON
A DIVISION OF **GENERAL DYNAMICS**
1489 N. Goodman St., Rochester 3, New York

for Time or Pulse Height Analysis

The new Eldorado System 1500 looks like one instrument, but can economically serve as two. This is made possible by two interchangeable control units (see below). One operates the 1500 as a 20-channel time analyzer; the other as a 20-channel pulse height analyzer. Eldorado can furnish the 1500 with either or both control units, both designed for the simplest possible operation for their respective applications. Write us for prices and complete technical information.

APPLICATIONS As a time analyzer, the System 1500 can be used with any pulsed neutron source for making decay studies. The 1500 makes a time analysis of events which occur during a total interval of 200 μ s to 2 seconds. As a pulse height analyzer, the 1500 operates as an inexpensive general purpose instrument for obtaining spectrums of up to 100 points.

Control Units for
Pulse Height Analysis (left)
and Time Analysis

KEY SPECIFICATIONS

No. of Channels	20
Storage Capacity, per channel	10 ⁵
Double Pulse Resolution, each channel	10 μ sec
Maximum Counting Rate, each channel	250 counts/second

SPECIFICATIONS, TIME ANALYZER

Input Signal Requirements	Detector	Trigger
Amplitude	5 volts	35 volts
Polarity	Positive	Positive
Pulse Width	—	4 micro-seconds
Channel Width	10 ⁻⁵ , 10 ⁻⁴ , 10 ⁻³ , 10 ⁻² , 10 ⁻¹ second	

SPECIFICATIONS, OPTIONAL PULSE HEIGHT ANALYZER

Channel Width	1 volt
Double Pulse Resolution	2 microseconds
Channel Width Stability	Typically $\pm 1.5\%$ per day
Window Width	20 volts
Window Position Range	5 to 105 volts, continuously variable
Window Threshold Stability	Typically 0.1% per week
Input Pulse Requirements	
Polarity	Positive
Rise Time	20-200 millimicro-seconds
Fall Time	50-300 millimicro-seconds
Minimum Pulse Width	0.75 microsecond at 70% amplitude

1961

February

- 1-4 American Physical Society, Hotel New Yorker, NYC (K. K. Darrow, 538 W. 120 St., New York 27, N. Y.)
- 1-4 American Association of Physics Teachers, Hotel New Yorker, NYC; send abstracts to M. Correll, DePauw U., Greencastle, Ind. (F. Verbrugge, U. of Minnesota, Minneapolis 14, Minn.)
- 15-17 Solid-State Circuits Conf., internat'l, spon'd by IRE, AIEE, U. of Pa. at U. of Pa. & Sheraton Hotel, Philadelphia; send abstracts before Oct. 14 to J. J. Suran, Bldg. 3, Rm. 115, GE Co., Electronics Park, Syracuse, N. Y. (See Sept. PT, p. 76) (F. H. Blecher, Bell Telephone Labs, Murray Hill, N. J.)

Following pioneer achievements in reactor power plant developments, the Knolls Atomic Power Laboratory is now studying major problems in reactor and power plant simplification. Solutions to be achieved may considerably advance nuclear reactor applications.

Working on unique developmental problems at KAPL, engineers and scientists have access to an unusually broad range of specially-designed experimental and test equipment...as well as the advantages of inter-professional consultation with experts in a number of related fields. Advanced nuclear studies are available at both the Laboratory and nearby colleges.

NEW OPENINGS ANNOUNCED

FOR NUCLEAR ENGINEERS AND SCIENTISTS

You are invited to inquire about openings in:

Mechanical Equipment Design / Control & Instrumentation Design / Reactor Design Analysis / Power Plant Test & Analysis / Reactor Physics / Nuclear Analysis / Coolant Technology / Computer Programming / Radiological Physics.

Please write fully in strict confidence to Mr. A. J. Scipione, Dept. 51-MJ, U.S. Citizenship and appropriate engineering or scientific degree required.

Knolls Atomic Power Laboratory

OPERATED FOR A E C BY

GENERAL  ELECTRIC

Schenectady, New York

PHYSICISTS

Phd., M.S.

Two Openings in New Unique Experimental Research Program

Interest or experience required in either:

1. Microwave spectroscopy, microwave plasma interactions, and related experimental techniques or
2. Very high vacuum, bakeable systems.

Location: New York City

Salary: Open

Please send resumé or phone (collect)

REACTOR PHYSICS THEORETICAL-EXPERIMENTAL

Expanding research and development programs at the Windsor Laboratories of Combustion Engineering's Nuclear Division have resulted in increased activity in reactor physics.

A limited number of staff appointments are available to qualified individuals at both the BS and graduate degree levels. These positions entail the study and development of basic reactor theory and nuclear design methods, as well as the analysis of criticality, reactivity lifetime, nuclear control and shielding of advanced nuclear reactor cores. Our programs for the evaluation of advanced core types and fission fuel cycles emphasize the role of the individual contributor in the development of fresh approaches and new techniques.

Our facility for critical assemblies is employed for experimental reactor measurements necessary to assess the validity of theoretical predictions.

Located nine miles from the center of Hartford, Connecticut, the Nuclear Division is within short driving distance of some 50 smaller communities. Boston and New York City are only two and one-half hours by car over four-lane divided expressways. Excellent housing and schools are available and New England's famous mountain and seashore areas are readily accessible.

Address inquiries to: R. P. Killelea, Manager, Professional Recruiting, Nuclear Division, Combustion Engineering, Inc., Windsor, Connecticut.

1961

March

- 2-4 **Optical Society of America**, Pick-Roosevelt Hotel, Pittsburgh, Pa. (Mary Waga, 1155 16th St., N. W., Washington 6, D. C.)
- 20-22 **American Physical Society**, US Naval Postgraduate School, Monterey (W. A. Nierenberg, U. of Calif., Berkeley 4, Calif.)
- 27-31 Temperature—Its Measurement & Control in Science & Industry, nat'l symp. spons'd by AIP, ISA, NBS, Columbus, Ohio (See July PT, p. 74) (C. M. Herzfeld, Nat'l Bureau of Standards, Washington 25, D. C.)

April

- 11-13 Ultrapurification of Semiconductor Materials Conf., New England Mutual Hall, Boston (Electronics Research Directorate, L. G. Hanscom Field, Bedford, Mass.)
- 18-20 Chemical Reactions in the Lower & Upper Atmosphere Symp. spons'd by Stanford Research Inst., at Mark Hopkins Hotel, San Francisco (See Aug. PT, p. 62) (R. D. Cadle, SRI, Menlo Park, Calif.)
- 24-27 **American Physical Society**, Sheraton-Park Hotel, Washington, D. C. (K. K. Darrow, 538 W. 120 St., New York 27, N. Y.)

May

- 7-8 Topology in Circuit Theory, 5th Midwest Symp. at Allerton Pk. in Monticello, & U. of Ill. in Urbana (See May '60 PT, p. 73) (M. E. Van Valkenburg, U. of Ill., Urbana, Ill.)
- 11-13 **Acoustical Society of America**, Bellevue-Stratford Hotel, Philadelphia, Pa. (M. E. Hawley, RCA, Moorestown, N. J.)

June

- 12-15 Physics of Electronic & Atomic Collisions, internat'l conf., U. of Colo., Boulder (See July '60 PT, p. 75) (B. Bederson, New York U., New York 53, N. Y.)
- 18-21 **American Astronomical Society**, Nantucket (A. Hynek, Smithsonian Astrophysical Observatory, 60 Garden St., Cambridge 38, Mass.)
- 22-24 **American Physical Society**, U. of Mexico, Mexico City (K. K. Darrow, 538 W. 120 St., New York 27, N. Y.)
- 22-24 **American Association of Physics Teachers**, Stanford U., Palo Alto, Calif. (F. Verbrugge, U. of Minnesota, Minneapolis 14, Minn.)

July

- 10-14 Optical Instruments & Techniques Conf., arranged by British Nat'l Comm. for Physics under auspices of Internat'l Commission for Optics, London (K. J. Habell, Nat'l Physical Lab, Teddington, Middlesex, England)
- 27-1 Macromolecular Chemistry, internat'l symp., Queen Elizabeth Hotel, Montreal (Organizing Comm., Internat'l Symp. on Macromolecular Chem., P. O. Box 816, Sarnia, Ont., Canada)
- 31-4 Internat'l Congress of Biophysics, Stockholm (B. Lindström, Karolinska Institutet, Stockholm 60, Sweden)

NUCLEAR
DIVISION

COMBUSTION ENGINEERING, INC.

PHYSICS TODAY

TO MEET our long-range requirements and to provide the additional scientific personnel necessary for our new programs of expansion, the positions noted below represent some of the openings on our staff; however, positions are available in virtually all of the major engineering and scientific disciplines in which we are interested:

SYSTEMS ENGINEER

Substantial background in guidance systems analysis necessary. Experience in radio and inertial guidance or missile-borne digital computers desirable. Will perform systems design and integration.

REACTOR ENGINEER OR PHYSICIST

Must have advanced degree. Prefer Ph.D., for programs of Nuclear Reactor, Core, and Shield Analysis and Shield Design. Substantial analytical background necessary.

COMPUTER ENGINEER

For a program of analysis and development of computational techniques for navigation and guidance of space vehicles. Position requires ability to pursue program of machine computation and specify design of related missile-borne computer.

The company's major fields of activity are: Radio and Optical Frequency Spectroscopy . . . Navigational Equipment and Systems . . . Microwave Components and Antennas . . . Radome Design . . . Hydrodynamics . . . Nuclear Research . . . Materials Research and Development . . . Sonar.

If you are interested and qualified, please forward complete confidential resume to: W. W. Patterson, Director of Personnel,
