

Richard M. Bozorth (left), J. H. Van Vleck, and Magnetism Conference Chairman C. Lester Hogan,

a desk set in appreciation of Dr. Bozorth's efforts on behalf of the Conference.

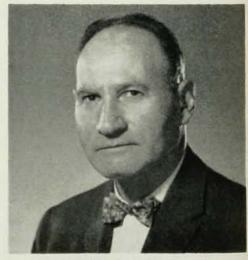

Dr. Bozorth has been with the Bell System since 1923 and with the Bell Laboratories since their formation in 1925. He was primarily responsible for the origination of the Magnetism Conference, which is jointly sponsored by the American Institute of Physics and the American Institute of Electrical Engineers, with the cooperation of the Institute of Radio Engineers, the Metallurgical Society of AIME, and the Office of Naval Research. A fellow of the American Physical Society, Dr. Bozorth has served as an associate editor of the Journal of Applied Physics, and as chairman of the panels on Magnetic Research in the Defense Department and on Permanent Magnets under the sponsorship of the National Academy of Sciences—National Research Council.

Alumni Awards

Queens College Alumni Association honored H. William Koch, chief of the High Energy Radiation Section of the National Bureau of Standards Radiation Physics Division, by naming him as its "Alumnus of the Year". The award, the first to be given by the Association, was presented at the college's annual homecoming dinner on November 5. A member of Queens' first graduating class, Dr. Koch received his BS in 1941. He did his graduate work at the University of Illinois and was on the staff at Illinois and at the Clinton Laboratories in Oak Ridge, Tenn., before joining NBS in 1949.

Mark W. Zemansky, professor of physics at the City College of New York, was presented on November 2 with one of the CCNY Alumni Association's twentyseventh annual Townsend Harris Medals for distinguished post-graduate achievement. The Medal is named for the founder of the college.

Prof. Zemansky graduated from City College in 1921 and has been a member of the faculty there since the following year when he was named a tutor in physics. He was appointed to a full professorship in 1949 and served as chairman of the Physics Department from 1956 to 1959. A fellow of the American Physical Society and a member and past president of the American Association of Physics Teachers, Prof. Zemansky has served as an associate editor of the AAPT's American Journal of Physics. He is the author or coauthor of several much-used textbooks in physics, including his Heat and Thermodynamics and the college and university physics texts written with Francis W. Sears.

Harris Medalist Mark W. Zemansky.
