

BOOKS RECEIVED

Principles of Physics. By Earnest S. Greene. 806 pp. Prentice-Hall, Inc., Englewood Cliffs, N. J., 1962. \$9.75.

Experimentation: An Introduction to Measurement Theory and Experiment Design. By D. C. Baird. 198 pp. Prentice-Hall, Inc., Englewood Cliffs, N. J., 1962. \$6.00.

Thermodynamics of Solids. By Richard A. Swalin. 343 pp. John Wiley & Sons, Inc., New York, 1962. \$12.50.

Wave Mechanics of Crystalline Solids. By R. A. Smith. 473 pp. John Wiley & Sons, Inc., New York, 1961. \$13.00.

Superfluid Physics. By Cecil T. Lane. 226 pp. McGraw-Hill Book Co., Inc., New York, 1962. \$9.50.

Elements of Modern Physics. By Alfred T. Goble and David K. Baker. 498 pp. The Ronald Press Co., New York, 1962. \$8.75.

Electrical Conductivity in Organic Solids. Symp. Proc. (Duke U., April 1960). H. Kallmann and M. Silver, eds. 398 pp. Interscience Publishers, a division of John Wiley & Sons, Inc., New York, 1961. \$12.50.

The Wave-Guide Mode Theory of Wave Propagation. By K. G. Budden. 325 pp. (Logos Press, London) Prentice-Hall, Inc., Englewood Cliffs, N. J., 1961. \$16.00.

Introductory Atomic Physics. By M. Russell Wehr and James A. Richards, Jr. 420 pp. Addison-Wesley Publishing Co., Inc., Reading, Mass., 1962. \$8.75.

Fundamentals of Rockets, Missiles and Spacecraft. By Marvin Hobbs. 275 pp. John F. Rider Publisher, Inc., New York, 1962. \$8.95.

Linear Signal-flow Graphs and Applications. By Yutze Chow and Etienne Cassagnol. 144 pp. John Wiley & Sons, Inc., New York, 1962. \$6.95.

Design Guide to Orbital Flight. By Jorgen Jensen, George Townsend, Jyri Kork, Donald Kraft. 896 pp. McGraw-Hill Book Co., Inc., New York, 1962. \$17.50.

Classical Electricity and Magnetism (2nd ed.). By Wolfgang K. H. Panofsky and Melba Phillips. 494 pp. Addison-Wesley Publishing Co., Inc., Reading, Mass., 1962. \$12.50.

Non-Euclidean Geometry. By Stefan Kulczycki. Transl. from Polish by Stanislaw Knapowski. Vol. 16 of International Series of Monographs on Pure and Applied Mathematics, edited by I. N. Sneddon, S. Ulam, and M. Stark. 208 pp. (Państwowe Wydawnictwo Naukowe, Warsaw) Pergamon Press Inc., New York, 1961. \$10.00.

The Electrochemistry of Semiconductors. P. J. Holmes, ed. Vol. 10 of Physical Chemistry, edited by Eric Hutchinson and P. Van Rysselberghe. 396 pp. Academic Press Inc., New York, 1962. \$12.00.

Fluorescence Assay in Biology and Medicine. By Sidney Udenfriend. Vol. 3 of Molecular Biology, edited by Nathan O. Kaplan and Harold A. Scheraga. 505 pp. Academic Press Inc., New York, 1962. \$14.00.

Electrical Breakdown of Insulating Liquids. By J. A. Kok. 132 pp. (Philips Technical Library, Eindhoven) Interscience, division of John Wiley & Sons, Inc., New York, 1961. \$6.00.

The Tides and Kindred Phenomena in the Solar System (Reprint of 1898 ed.). By George Howard Darwin. 378 pp. W. H. Freeman and Co., San Francisco, 1962. Paperbound \$2.75.

Studies in Statistical Mechanics, Volume 1. J. De Boer and G. E. Uhlenbeck, eds. 350 pp. (North-Holland, Amsterdam) Interscience, division of John Wiley & Sons, Inc., New York, 1962. \$13.75.

Atomic Spectra. By H. G. Kuhn. 436 pp. Academic Press Inc., New York, 1962. \$13.00.

Mathematical Statistics and Probability. Symp. Proc. (Berkeley, Summer 1960). Jerzy Neyman, ed. Vol. 1, Theory of Statistics, 767 pp., \$16.00; vol. 2, Probability Theory, 633 pp., \$13.50; vol. 3, Astronomy, Meteorology, and Physics, 335 pp., \$7.00. University of California Press, Berkeley, 1961.

Nonlinear Oscillations. By Nicholas Minorsky. 714 pp. D. Van Nostrand Co., Inc., Princeton, N. J., 1962. \$16.75.

Qualitative Methods in the Many Body Problem. By G. F. Khilmi. Transl. from Russian by B. D. Seckler. 117 pp. Gordon and Breach Science Publishers, Inc., New York, 1961. \$6.50.

Physics in the Soviet Union. An Exposition of Theoretical Physics. By A. S. Kompaneyets. Transl. from Russian and edited by George Yankovsky. 592 pp. Philosophical Library Inc., New York, 1962. \$7.50.

The New World, 1939/1946. Volume 1 of a History of the US Atomic Energy Commission. By Richard G. Hewlett and Oscar E. Anderson, Jr. 766 pp. The Pennsylvania State U. Press, University Park, Pa., 1962. \$5.50.

Atomic Theory and the Description of Nature (reprint of 1934 ed.). Four Essays With an Introductory Survey. By Niels Bohr. 119 pp. Cambridge U. Press, New York, 1961. Paperbound \$1.65.

Miniature and Microminiature Electronics. By G. W. A. Dummer and J. W. Granville. 310 pp. John Wiley & Sons, Inc., New York, 1961. \$7.50.

Forty Years of Radio Research. By George C. Southworth. 274 pp. Gordon & Breach Science Publishers, Inc., New York, 1962. \$6.50.

Lie Algebras. By Nathan Jacobson. No. 10 of Tracts in Pure and Applied Mathematics, edited by L. Beers, R. Courant, J. J. Stoker. 331 pp. Interscience Publishers, a division of John Wiley & Sons, Inc., New York, 1962. \$10.50.

Permanent Magnets and Their Application. By Rollin J. Parker and Robert J. Studders. 406 pp. John Wiley & Sons, Inc., New York, 1962. \$16.00.

Engineering Aspects of Magnetohydrodynamics. Symp. Proc. (Philadelphia, March 1961). Clifford Mannal and Norman W. Mather, eds. 578 pp. Columbia U. Press, New York, 1962. \$13.50.

Modern Theories of Development (reprint of 1933 ed.). An Introduction to Theoretical Biology. By Ludwig Von Bertalanffy. Transl. from German by J. H. Woodger. 200 pp. Harper & Bros., New York, 1962. Paperbound \$1.50.

Nonequilibrium Thermodynamics. A Phenomenological Theory of Irreversible Processes in Fluid Systems. By Donald D. Fitts. 173 pp. McGraw-Hill Book Co., Inc., New York, 1962. \$7.95.

Scientists: Their Psychological World. By Bernice T. Eiduson. 299 pp. Basic Books, Inc., New York, 1962. \$6.50.

Worked Examples in Physics. Textbook for Private Study. By V. L. Zubov and V. P. Shal'nov. Transl. of Russian 5th ed. by Edwin Marquit. Transl. ed., D. L. Evans. 341 pp. Pergamon Press, Inc., New York, 1962. \$7.50.

Inelastic Scattering of Neutrons in Solids and Liquids. Symp. Proc. (Vienna, Oct. 1960). 651 pp. Internat'l Atomic Energy Agency, Vienna, 1961. Distr. in US by Internat'l Publications, Inc., New York. Paperbound \$12.00.

Advances in Hypervelocity Techniques. Symp. Proc. (U. of Denver, March 1962). Arthur M. Krill, ed. 795 pp. Plenum Press, Inc., New York, 1962. \$19.50.

Polarized Light. Production and Use. By William A. Shurcliff. 207 pp. Harvard U. Press, Cambridge, Mass., 1962. \$6.25.

The Many-Body Problem. Lecture Notes (Bergen Internat'l School of Physics, 1961). Christian Fronsdaal, ed. 310 pp. W. A. Benjamin, Inc., New York, 1962. Paperbound \$9.75.

Lectures in Theoretical Physics, Volume 1. (Brandeis U. Summer Inst. 1961). By R. J. Eden, J. C. Polkinghorne, G. Källén, J. J. Sakurai. 395 pp. W. A. Benjamin, Inc., New York, 1962. Paperbound \$4.00.

The Mössbauer Effect. A Review—with a Collection of Reprints. By Hans Frauenfelder. 333 pp. W. A. Benjamin, Inc., New York, 1962. Paperbound \$3.95.

Methods of Mathematical Physics. By R. Courant and D. Hilbert. Vol. 2, Partial Differential Equations, by R. Courant. 830 pp. Interscience Publishers, a division of John Wiley & Sons, Inc., New York, 1962. \$17.50.

New Perspectives in Physics. By Louis de Broglie. Transl. from French by A. J. Pomerans. 291 pp. Basic Books, Inc., New York, 1962. \$6.00.

Molecular Structure and the Properties of Liquid Crystals. By G. W. Gray. 314 pp. Academic Press, London and New York, 1962. 63s.

High Magnetic Fields. Conf. Proc. (Mass. Inst. of Technology, Nov. 1961). Henry Kolm, Benjamin Lax, Francis Bitter, Robert Mills, eds. 751 pp. The M.I.T. Press and John Wiley & Sons, Inc., New York, 1962. \$15.00.

The Wave Mechanics of Electrons in Metals. By Stanley Raimes. 367 pp. (North-Holland, Amsterdam) Interscience, division of John Wiley & Sons, Inc., New York, 1961. \$13.00.

Space Research, Volume 2. Symp. Proc. (Florence, April 1961). H. C. van de Hulst, C. de Jager, A. F. Moore, eds. 1241 pp. (North-Holland, Amsterdam) Interscience, division of John Wiley & Sons, Inc., New York, 1961. \$29.50.

Living With The Atom. By Ritchie Calder. 275 pp. U. of Chicago Press, Chicago, Ill., 1962. \$5.95.

Nuclear Ship Propulsion. Symp. Proc. (Taormina, Italy, Nov. 1960). 604 pp. Internat'l Atomic Energy Agency, Vienna, 1961. Distr. in US by Internat'l Publications, Inc., New York. Paperbound \$10.00.

Vector Mechanics for Engineers. Part 2, Dynamics. H. R. Nara, ed. 434 pp. John Wiley & Sons, Inc., New York, 1962. \$6.50.

Machine-Independent Computer Programming. By Maurice H. Halstead. 267 pp. Spartan Books, Washington, D. C., 1962. \$6.50.

Inertial Guidance. George R. Pitman, Jr., ed. 481 pp. John Wiley & Sons, Inc., New York, 1962. \$18.50.

Opportunity for Independent Studies
of National Importance

Thermal Emission Research

We seek two Physicists who understand the emission and absorption of radiant energy . . . physical optics . . . and the instruments used therein. They must be capable of planning, conducting, supervising, and evaluating research programs where little or no work has been done before.

If you are one of them, your work will have immediate application to satellites and space vehicles—and your future in METROLOGY (the science of Precision Measurement) very promising.

You will be working in the Metallic Building Materials Section of the National Bureau of Standards, with overall responsibility for measurement studies of the reflection, absorption and emission of radiant energy.

Specifically, you will take over these three study areas:

1. *Evaluation of normal spectral emission of coated and uncoated metals;*
2. *Design and Construction of equipment required (0.3 to 40 microns, 0° to 2500° C);*
3. *Computation of specimen absorptance for solar energy, exhaust gas radiant energy . . . and their total emittance.*

Your future with the growing National Bureau of Standards may be particularly promising because of the sharply increased need for greater precision of measurement and standards in all areas of our technology. Your immediate work will help close any "measurement gap" that may exist in our space program.

Starting salaries range from \$8,340 to \$10,250, and include the exclusive benefits of Career Civil Service. Positions are at the NBS facility here in northwest Washington, adjacent to the most favored residential areas.

Send complete qualifications to Henry C. Bothe, Chief of Recruitment and Placement.

National Bureau of Standards

Connecticut Ave. at Van Ness St., N.W.
Washington 25, D. C.
