

PHYSICISTS AND RESEARCH ENGINEERS

UNUSUAL OPPORTUNITIES FOR PROFESSIONAL CAREERS. CHALLENGING PROBLEMS IN THE THEORETICAL ASPECTS OF:

- Space Physics
- Nuclear Weapons Effects
- Satellite Systems Studies
- Theory of Communications
- Self-Adaptive Systems
- Operations Research
- Owned and Managed by Employee-Scientists
- Southwest Climate - Low Population Density
- Wide Range of Benefits Including Profit Sharing
- No Hardware Development or Production
- Emphasis Placed on Theoretical Concepts
- Advanced Degree Desirable

ADDRESS INQUIRIES TO:

THE
Dikewood
CORPORATION

4805 Menaul Blvd. N.E.

Albuquerque, N. M.

PHYSICAL CHEMIST OR PHYSICIST

WE ARE SEEKING FOR OUR STAFF—

An experienced senior scientist to engage in a wide variety of problems in electron spin resonance.

A UNIQUE OPPORTUNITY—

To perform diversified and stimulating studies in atomic and molecular phenomena in various scientific disciplines. Modern laboratory equipment available to support programs in these areas. Salary open.

IF YOU HAVE—

An M.S. or Ph.D. in Physical Chemistry or Physics, training or experience in spin resonance and a background in other instrumentation methods, please send resume to:

R. C. Mays, Director of Personnel
SOUTHWEST RESEARCH
INSTITUTE

8500 Culebra Road
San Antonio 6, Texas

An Equal Opportunity Employer

Physics, in cooperation with the National Science Foundation, will assist in promoting the circulation of the new journal in the United States.

Single copies, beginning with the July 1962 issue, cost \$1; the subscription price for the July–December 1962 period is \$5, and for the January–December 1963 period it is \$10. Subscription requests should be addressed to the Publication Office, *Japanese Journal of Applied Physics*, No. 342, Physics Building, Faculty of Science, University of Tokyo, Bunkyo-ku, Tokyo, Japan.

AEC References

A revised edition of *Special Sources of Information on Isotopes* (TID-4563) (3rd Rev.), has been compiled by the Atomic Energy Commission's Division of Isotopes Development. The 83-page publication lists 648 references to available papers and reports and includes an introductory chapter on radioisotopes and a list of AEC depository libraries which are well stocked with isotope literature. The bibliography is available without charge from the Information Section, Division of Technical Information Extension, US Atomic Energy Commission, P.O. Box 62, Oak Ridge, Tenn.

Reports, articles, and translations dealing with the non-nuclear research activities of the Atomic Energy Commission will be abstracted in a new publication, *Research and Development Abstracts of the USAEC*. The new publication will be made available irregularly through the Office of Technical Services. According to OTS, it will complement *Nuclear Science Abstracts*, published by the AEC, since it will list material originating in Commission activities but falling outside the scope of nuclear science.

The first issue, covering the period January–March 1962, contains 229 entries on physics, biology and medicine, chemistry, engineering and equipment, instrumentation, geology, mineralogy and meteorology, mathematics and computers, metals, ceramics and other materials, and miscellaneous subjects. Later issues will be printed as the volume of reports warrants. Copies of the publication (RDA-1) can be ordered for 50¢ each from the Office of Technical Services, US Department of Commerce, Washington 25, D. C.

Computer Conference Proceedings

The American Federation of Information Processing Societies has sponsored publication of *The Proceedings of the 1962 Spring Joint Computer Conference*, containing papers given at the meeting, which was held in San Francisco in May. Subjects covered in the volume include the study of theoretical problems of artificial intelligence, man-machine cooperation, data analysis and model construction in the study of the nervous system, and other information-processing applications. Copies are available for \$6 from the National Press, 850 Hansen Way, Palo Alto, Calif.
