

OF HIGHER ORDER

William Corlett

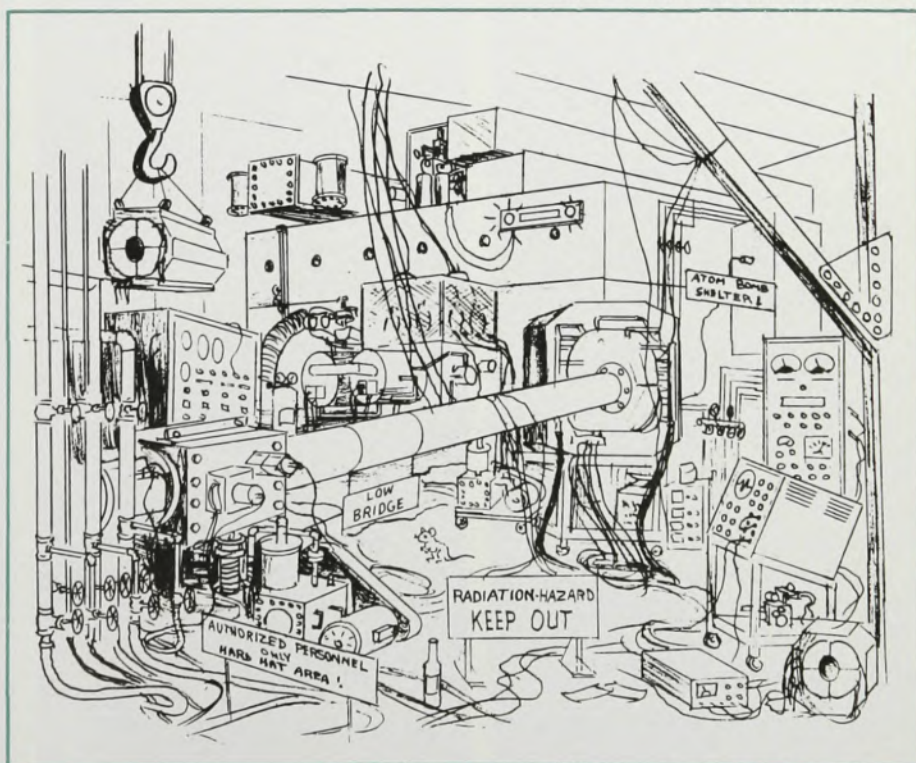

This cartoon, first published in December 1939, is reprinted by permission of the artist, William Corlett, and *The California Pelican* in which it first appeared. Corlett is now a San Francisco architect and is still involved with physics and physicists. His firm has designed the Heavy Ion Accelerator building and numerous others at the Lawrence Radiation Laboratory, Berkeley. Now they are working with Ernest Lawrence's brother John on the Omnitron complex near the original cyclotron building.

"Toughest damn atom I ever saw!"

David L. Judd and Ronald MacKenzie

Readers liked the earlier series of Judd and MacKenzie cartoons that we published in August 1967. Since this one was crowded out at the time, we add it now to continue the series.

THE CYCLOTRON AS SEEN BY THE VISITOR
