

# calendar

This is a complete calendar. It lists all physics-related meetings known to us. For the next two months we will publish only new information (partial calendar); in the third month (January) we will again publish a complete calendar as far into the future as we have information. During months with a partial calendar, readers can add new entries to their last complete calendar.

Information in the calendar is compiled from a file maintained in the PHYSICS TODAY office. Readers are invited to write or telephone for general calendar information beyond what we print. For complete information concerning an entry, readers are advised to consult the contact and the original PHYSICS TODAY reference.

## Abbreviations:

AAPT—American Association of Physics Teachers

AAS—American Astronomical Society

ACA—American Crystallographic Assoc.

APS—American Physical Society

ASA—Acoustical Society of America

OSA—Optical Society of America

S OF R—Society of Rheology

AEC—US Atomic Energy Commission

AFCLR—Air Force Cambridge Research Laboratories

ANS—American Nuclear Society

AVS—American Vacuum Society

IAEA—International Atomic Energy Agency

IEEE—Institute of Electrical and Electronics Engineers

IPPS—The Institute of Physics and The Physical Society

IUPAP—International Union of Pure and Applied Physics

NBS—National Bureau of Standards

ORNL—Oak Ridge National Laboratory

## OCTOBER 1970

1,2 Thermophysical Properties ☐ AMER. SOC. OF MECHANICAL ENGINEERS ☐ Newton, Mass. 5/70

1,2 • Magnetic Resonance ☐ UNIV. OF S. C. DEPT. OF PHYSICS ☐ Columbia, S. C. (C. P. Poole, Dept. of Physics, Univ. of S. C., Columbia, S. C. 29208) 10/70

2,3 Fluctuations and Critical Phenomena ☐ NYS SECTION OF APS ☐ Canton, N. Y. 8/70

4-10 International Astronautical Congress ☐ INTERNATIONAL ASTRONAUTICAL FEDERATION ☐ Constance, Germany 3/70

5-7 Gallium Arsenide and Related Compounds ☐ TECHNISCHE HOCHSCHULE, IPPS, US AIR FORCE ☐ Aachen, Germany 4/70

5-9 Plutonium Conference ☐ Santa Fe, New Mexico 2/70

5-9 Nuclear Power Stations ☐ IAEA, US AEC, UNITED NATIONS ECONOMIC COMMISSION FOR EUROPE ☐ Vienna, Austria 4/70

5-10 ☐ SOC. OF APPLIED SPECTROSCOPY ☐ New Orleans, La. 9/70

5-10 Thin Films ☐ SOCIÉTÉ FRANÇAISE DES INGENIEURS ET TECHNICIENS DU VIDE ☐ Cannes, France 5/70

7,8 High-Temperature Science ☐ FRANKLIN INSTITUTE RES. LABS ☐ Philadelphia, Pa. 5/70

8,9 ☐ APS OHIO SECTION ☐ Granville, Ohio 4/70

11-17 Physics and Chemistry of Semiconductor Heterojunctions and Layer Structures ☐ IUPAP, EUR. PHYS. SOC. ☐ Budapest 3/70

12-14 Electrical Insulation and Dielectric Phenomena ☐ NATL. ACAD. SCI., NATL. RES. COUNCIL ☐ Pocono Manor, Pa. 6/70

13 Superconductivity and Magnetism ☐ IPPS ☐ London, UK 6/70

14,15 ☐ NATL. ACAD. OF ENGINEERING ☐ Washington, D. C. 9/70

15-17 ☐ APS DIVISION OF NUCLEAR PHYSICS ☐ Houston, Texas 4/70

16,17 ☐ NEW ENGLAND SECTION OF APS ☐ Univ. of Maine, Orono 7/70

16-18 • ☐ SWISS PHYSICAL SOC. ☐ Basel, Switzerland (F. Kneubühl, Physik-Institut, ETH, Gloriastr. 35, CH-

## QUALITY BEGETS QUALITY.

First, we build the Channeltron Electron Multiplier. A small, sophisticated high quality electron measuring device. It's the best in its field.

Next we took the Channeltron, put it in a glass tube, added an S-20 photocathode with high red spectral response and a sensitivity of at least 80 microamperes per lumen. Then, we put these high quality parts together with the typical skill that has made Bendix a leader in electronics for decades. We ended up with a Channeltron Photon Counter Tube, which is also the best in its field.

We call it the Bendix Model BX 754. It features very low dark noise without cooling, insensitivity to voltage when used as a photon counter, narrow pulse height distribution, only four active terminals, and has relative insensitivity to magnetic and electrostatic fields.

As frosting on the cake, we took the BX 754, which has a wavelength response from 8500Å to 3500Å switched around a few gizmos, and came up with the BX 764, which has a wavelength response from 8500Å to 2050Å.

That's what we mean by "Bendix Quality" — which, by the way, is a very meaningful redundancy. For more information about the BX-754 and BX-764, write: The Bendix Corporation, Electro-Optics Division, Marketing Department, 1975 Green Road, Ann Arbor, Michigan 48107. TEL: (313) 663-3311.

Electro-Optics Division is part of the Bendix Aerospace-Electronics Company.

# THIS PICTURE ISN'T WORTH 1,000 WORDS!

It's worth more . . . more words  
than this available space can hold.

Briefly, this is a liquid helium research dewar used for collection of neutron diffraction data in a controlled temperature environment . . . from 5°K to 300°K. It is Heliarc welded aluminum with the helium reservoir nitrogen shielded and super-insulated. It's complete with all the obvious features for peak performance, including your choice of special tail configurations with or without optics.

This research dewar is just one of many produced by Cryogenic Associates. It represents . . . the finest in Cryogenic Systems". And for good reason. A few of Cryogenic Associates' exclusive talents include:

- Custom fabrication of non-nitrogen shielded helium dewars that provide increased holding times. (Nitrogen shields available, too.)
- Joining of stainless steel and aluminum in combination with plastic for lighter weight, less heat loss.
- Exclusive use of Heliarc (t.i.g.) welding to produce the tightest, longest-performing dewars known today.
- Management know-how that continues to provide superior engineering talents tailored to deliver custom design, quality and service on a competitive basis.

Don't forget Cryogenic Associates' supporting equipment for complete systems, either. It ranges all the way from the **exclusive** custom flexible tube transfer lines to temperature controllers and sensors.

## NEW LISTING OF SHORT COURSES AND SCHOOLS

### JANUARY-MARCH

Nuclear Theory □ Trieste, Italy (*Deputy Director, Intl. Center for Theoretical Physics, P. O. Box 586, I-34100 Trieste, Italy*) [11/70]

### 14, 15 JANUARY

Laser Power and Energy Measurements □ NBS □ Boulder, Colo. (*Administrative Officer, NBS Radio Standards Physics Div., Boulder, Colo. 80302*)

### 25-29 JANUARY

Direct Energy Conversion □ ARIZ. STATE UNIV. □ Tempe, Ariz. (*C. E. Backus, College of Engineering Sciences, Ariz. State Univ., Tempe, Ariz. 85281*) [1/71]

### 15-27 FEBRUARY

Relativistic Quantum Theory □ Karpacz, Poland (*J. Lukierski, Inst. of Theoretical Physics, Univ. of Wrocław, Cybulskiego 36, Wrocław, Poland*)

### 16-19 MARCH

High Frequency and Microwave Impedance □ NBS □ Boulder, Colo. (*R. E. Nelson, 272.04, H. F. Circuit Standards Section, NBS, Boulder, Colo. 80302*)

### 3-5 MAY

Colorimetry and Spectrophotometry □ NBS □ Gaithersburg, Md. (*I. Nimeroff, NBS Office of Colorimetry, Wash., D. C. 20234*)

CIATION □ Wash., D.C. 2/70

7-10 □ AAS □ Tampa, Fla. 4/70

7-10 □ AMERICAN GEOPHYSICAL UNION □ San Francisco 3/70

14, 15 • Optical Studies of Adsorbed Layers □ London (*The Faraday Soc., 6 Gray's Inn Square, London WC1*) 10/70

14-18 Relativistic Astrophysics □ UNIV. OF TEXAS □ Austin, Texas 4/70

26-31 □ AMERICAN ASSOC. FOR THE ADVANCEMENT OF SCIENCE □ Chicago 6/70

28-31 □ APS □ Stanford, Calif.

### JANUARY 1971

4-7 Solid-State Physics and Applications □ FLORIDA ATLANTIC UNIV. □ Boca Raton, Fla. 9/70

5-7 Solid-State Physics □ IPPS □ Univ. of Manchester 6/70

25, 26 Optics in Microelectronics □ OSA □ Las Vegas, Nev. 9/70

25-27 Aerospace Sciences □ AMER. INST. OF AERONAUTICS AND ASTRONAUTICS □ New York, N. Y. 5/70

### FEBRUARY 1971

1-3 □ DIV. OF PLANETARY SCIENCES OF AAS □ Tallahassee, Fla. 9/70

1-3 • □ S O F R □ Salt Lake City, Utah 10/70

1-4 □ APS-AAPT □ New York

1-5 □ ACA □ Columbia, S.C. 6/70

18, 19 Theoretical Chemistry and Sulfur Chemistry □ New Orleans, La. 9/70

### MARCH 1971

1-3 Particle Accelerators □ IEEE □

Chicago 4/70

2-5 • Natural and Manmade Radiation in Space □ AEC, NASA □ Las Vegas, Nevada (*E. Warman, Aerojet Nuclear Systems Co., P. O. Box 13070, Sacramento, Calif.*) [11/70] 10/70

23-26 Negative Ions □ ATOMIC AND MOLECULAR PHYSICS SUBCOMMITTEE OF IPPS □ Liverpool, UK 9/70

29-31 • Magnetism □ AUSTRIAN PHYS. SOC., GERMAN PHYS. SOC., IPPS □ Salzburg, Austria (*German Physical Society, D-645 Hanau, Heraeusstr. 9*) [11/70] 10/70

29-1 □ AAS □ Baton Rouge, La.

29-1 □ APS □ Cleveland, Ohio

29-2 Statistical Mechanics □ IUPAP □ Chicago 8/70

30-2 • Semiconductor Devices □ GERMAN PHYS. SOC., IEEE, ASSOC. OF COMMUNICATION ENGINEERS □ Munich (*German Physical Society, D-645 Hanau, Heraeusstr. 9*) [12/70] 10/70

### APRIL 1971

3 • □ MICH. SECTION OF AAPT □ Kalamazoo, Mich. (*H. O. Hooper, Wayne State Univ., Detroit, Mich. 48202*) [3/71] 10/70

4-6 • Vacuum Equipment □ VACUUM GROUP OF IPPS □ Sussex, UK (*Meetings Officer, IPPS, 47 Belgrave Square, London SW1*) 10/70

5-7 • Elementary-Particle Physics □ NUCLEAR PHYSICS SUBCOMMITTEE OF IPPS □ Lancaster, UK (*Meetings Officer, IPPS, 47 Belgrave Square, London SW1*) 10/70

5-7 • Duality and Symmetry in Hadron Physics □ ORGANIZING COMMITTEE OF INTL. CONF. ON DUALITY AND SYMMETRY IN HADRON PHYSICS □ Tel Aviv (*E. Gotsman, Dept. of Physics and Astronomy,*

# ELSCINT STABILIZED SINGLE CHANNEL ANALYZER

FOR  
LONG TERM  
SYSTEM STABILITY

STABILIZED S.C. ANALYZER  
MODEL SCA-N-3

GAIN DRIFTS in detector or amplifying units are drastically reduced by internal or external compensation provided by Model SCA-N-3. INTERNAL STABILIZATION MODE: Dynamic Range:  $\pm 50\%$  of system gain for full scale baseline. System Gain Temp. Stability: Better than 50 ppm/°C. EXTERNAL STABILIZATION MODE: An analog output applied to the photomultiplier or amplifier compensates for gain drifts. RATE MODE: Operates as a normal SCA with a ratemeter

5-8 □ OSA □ Tucson, Ariz.

5-8 Atomic and Molecular Physics □  
IPPS □ York, UK 3/70

5-8 Low-Mobility Materials □ TECH-  
NION (ISRAEL INST. OF TECHNO-  
LOGY) □ Eilat, Israel 5/70

12-15 • Telemetry and the Environment  
□ IEEE □ Washington, D. C.  
(IEEE, 345 E. 47th St., N. Y.  
N. Y. 10017) 10/70

12-16 □ AMERICAN GEOPHYS. UNION,  
NATL. ACAD. SCI., NATL. RES.  
COUNCIL □ Wash., D. C. 3/70

13-15 Magnetics □ IEEE MAGNETICS  
GROUP □ Denver, Colo. 10/69

14-16 • High Voltage Electron Micros-  
copy □ ROYAL INST. OF TECH-  
NOLOGY MATERIALS CENTER, SWE-  
DISH INST. FOR METAL RESEARCH  
□ Stockholm (Y. Bergstrom, Swe-  
dish Inst. for Metal Research, 48  
Drottning Kristinas vag, S-114 28  
Stockholm, Sweden) [2/71]  
10/70

18-21 Neutron Sources □ SAVANNAH  
RIVER SECTION, ISOTOPES AND RA-  
DIATION DIV. OF ANS, SAVANNAH  
RIVER OPERATIONS OFFICE, AEC □  
Augusta, Georgia 7/70

18-23 Geoscience Electronics □ IEEE  
□ Wash., D. C. 2/70

19-23 • Radioisotopes and Radiation Ef-  
fects □ Anaheim, Calif. (Ameri-  
can Soc. for Testing and Mate-  
rials, 1916 Race St., Philadelphia,  
Pa. 19103) 10/70

19-23 Magnetohydrodynamics □ EURO-  
PEAN NUCLEAR ENERGY AGENCY,  
IAEA, GERMAN MINISTRY FOR EDU-  
CATION AND SCIENCE, GARCHING  
INST. FOR PLASMA PHYSICS □  
Munich 8/70

20-23 □ ASA □ Wash., D. C. 7/69

21-23 • Vacuum Science □ N. M. SEC. OF  
AVS □ Albuquerque, N. M. (D. G.  
Schreiner, P. O. Box 11451, Al-  
buquerque, N. M. 87112) 10/70

Topics: Surface physics; thin films; vacuum  
metallurgy; new-equipment survey.

26, 27 • □ WESTERN STATES SECTION OF  
COMBUSTION INST. □ Denver,  
Colo. (Office of Secretary, West-  
ern States Section, The Combustion  
Inst., 16902 Bollinger Drive,  
Pacific Palisades, Calif. 90272)  
10/70

26-28 Thermophysics Conference □  
AMERICAN INST. OF AERONAUTICS

# Thermal noise

# Stopped cold

## with EOA coolable PM Housings

- Dry ice (-78C) or N<sub>2</sub> cooling
- S/N improvement typically 100:1 (S-1 cathode)
- Available for variety of 1.5" and 2" PM tubes
- Exclusive EOvac™ frost and fog-free windows (glass or quartz)
- Lightweight, compact
- Integral anode selector switch
- Adapts easily for spectrometers, optical benches, etc.

For complete specifications, contact:

**ELECTRO**  
**EOA OPTICS**  
**ASSOCIATES**

974 Commercial Street, Palo Alto,  
California 94303 / (415) 327-6200

## Your recorder can now have megahertz response, memory and digital output!

Connect a 610 Transient Recorder to any YT or strip chart recorder, old or new, and it now has megahertz response, memory, and the added feature of digital output.

The 610 will record, hold and display any single shot signal! Rise time is 200 n Sec. A differential input amplifier feeds a 6 bit A/D converter with 100 samples taken, digitized and stored in the selected sweep time of 10 μsec to 5 Sec. Sweep is triggered externally or by the signal itself. The 610 can be triggered before, during or after the signal has occurred (pre-trigger recording!). The recorded information can be output in analog or digital form without erasing from memory. Stored information can be displayed on an oscilloscope, recorded on a YT, strip chart or digital recorder; or passed directly to a computer.

Applications include observing and recording single shot or repetitive electrical signals wherever they occur: Electronics, Physics, Chemistry, and Life Sciences.

Price: \$1750.00.

## biomation

1070 East Meadow Circle, Palo Alto, Calif. 94303 (415) 321-9710

- 10-12 • **Aerospace Instrumentation** □ ISA  
□ Las Vegas, Nevada (R. L. Thomas, Endeavor Corporation, 801 So. Arroyo Parkway, Pasadena, Calif. 91109) [11/70] 10/70

- 10-14 • **Measurement and Control of Flow in Science and Industry** □ AIP, AMER. SOC. OF MECHANICAL ENGINEERS, INSTRUMENT SOC. OF AMERICA, NBS □ Pittsburgh, Pa. (V. Giardina, Instrument Soc. of America, 400 Stanwix St., Pittsburgh, Pa. 15222) 10/70

Topics: Flow characteristics; flow-measuring devices; flow measurement and control techniques and biological-fluid flows.

- 12-14 • **Microscopy** □ N. Y. MICROSCOPICAL SOC. □ New York (J. A. Reffner/NYMS, Inst. of Materials Science, Univ. of Conn., Storrs, Conn. 06268) [12/70] 10/70

- 16-20 • **Microwaves** □ IEEE □ Chicago 4/70

## JUNE 1971

- 1-4 • **Laser Engineering & Applications** □ IEEE □ Wash., D.C. 5/70

- 9-11 • **Radiation-Induced Voids in Metals** □ AEC, STATE UNIV. OF N. Y. AT ALBANY □ Albany, N. Y. (J. W. Corbett, Physics Dept., SUNY/Albany, Albany, N. Y. 12203) [2/71] 10/70

Topics: Fast-neutron damage of cladding materials and noncladding materials; related accelerator experiments; injected gases and impurities; theory.

- 9-11 • **Carbon-13** □ LOS ALAMOS SCIENTIFIC LAB, AEC, ASSOC. WESTERN UNIVS. □ Los Alamos, N. M. 7/70

- 13-17 □ ANS □ Boston 8/69

- 13-19 • **World Petroleum Congress** □ Moscow 10/69

# High card... in the magnetic laboratory equipment game

Walker/MSI, pioneer in the field of magnetism is the one basic supplier of highly accurate magnetic laboratory equipment and systems. Walker/MSI precision instruments are pictured and described in the latest MSI catalog. It's free for the asking and should be in your files. Write or call O.S. Walker Co., Inc., Magnetic Systems and Instruments Division, Rockdale Street, Worcester, Mass. 01606; 617-853-3232.

Walker/MSI instruments include:

**HYSTERESIS GRAPHS AND SPECIAL MEASURING SYSTEMS** to accurately trace BH curves over the full range of magnetic materials.

**ELECTROMAGNETS** Ideal systems for demonstrating and teaching undergraduate physics and chemistry and for basic research. Power supplies, current regulated to .001%, in 5, 11 and 15 kilowatt models.

**PRECISION COILS** D.C. solenoids for plasma research, biological research, lasers and microwave TWT's. Also special coil systems built to customer specifications. All computer designed for optimum performance.

**INTEGRATING FLUXMETERS AND HALL GAUSSMETERS** to make accurate magnetic measurements.

Lincoln Laboratory, a research center of the Massachusetts Institute of Technology, conducts investigations in advanced electronics directed toward the solution of problems of national defense and space exploration. The *General Research* program provides a background of experience and ideas for programs concerned with specific defense and space problems, as well as a continuing source of contributions to electronics science and technology. All qualified applicants will receive consideration for employment without regard to race, creed, color or national origin. Lincoln Laboratory, Massachusetts Institute of Technology, Box 15, Lexington, Massachusetts 02173.

1-3 Antennas and Propagation □ INSTITUTE OF ELECTRONICS AND COMMUNICATION ENGINEERS OF JAPAN □ Sendai, Japan 10/69

6-10 Color Centers in Ionic Crystals □ ORGANIZING COMMITTEE FOR THE 1971 COLOR CENTER CONF. □ Reading, UK 8/70

6-15 4th International Conference on the Peaceful Uses of Atomic Energy □ UNITED NATIONS □ Geneva 2/70

13-17 Materials Symposium □ INOR-

## SPECTROSCOPY AMPLIFIER

**NEW**

### "Maximized Value Design"

... Model 510 offers unexcelled performance in high resolution spectroscopy systems. Instrument features:

- Front panel shaping control
- Prompt and delayed outputs
- D.C. restoration
- Integral linearity  $\pm 0.05\%$
- Delivery from stock .....\$395.00

**MODERN XRAY ANALYSES** using solid state energy dispersive techniques are compared against classical wavelength dispersive spectrometers. Areas of application include Electron Microscopes, Scanning Electron Microscopes, Microprobes, Xray Diffraction and Fluorescence, and Radioisotope Xray Excitation.

# AVCO LASERS

Dial-a-Line Tunable Wavelength Laser  
Provides Continuous Tuning  
From 360 nm to 650 nm

## Dial-a-Line Laser Features

- Sealed cells, no cooling or flowing of dyes
- Simple, fast dye cell replacement without mirror changes
- Low operating and maintenance costs
- Laser pumped — no flashlamp replacement
- Warranted performance and life

## A laser for micromachining

- Can produce slots less than 200 microns in width
- Can machine most materials
- Pulsed operation, high repetition rates
- High peak power
- Near diffraction limited UV output
- Test facility available

## Model C950 UV Laser

- UV output at 337.1 nm. Visible at 540.1 nm
- Pumps dyes efficiently and easily
- Pulsed operation, repetition rates up to 100 pps
- High peak power, 100 kW at 337.1 nm
- Stable operation
- Warranted performance and life
- Most reliable laser in its class

## A laser for interferometry

- Visible output at 540.1 nm with enough energy to expose film in a single pulse
- Pulsed operation — 3 nanosecond pulse width
- 30 cm coherence length

## PARTNERS IN RESEARCH

KLINGER announces the new Spindler and Hoyer partners in re-  
search—the HeNe 500N Laser, freshly and imaginatively redesigned  
in single unit construction to accommodate any desired components  
of the famous Micro Optical Bench.

In minutes, a micro optical system containing (among other things) a spatial filter, a beam ex-  
pander, and a beam steerer has been coupled to the laser to make up a specialized instrument with  
precise automatic alignment and quickly available microadjustments.

The power supply for the 5.8 mw laser is built into the base; the resonators are dust-proof but  
readily accessible for dismantling; the mirror holders may be easily removed for mounting the laser  
and resonators on a standard optical bench. The ease with which the system may be switched  
from one application to another is unbelievable until you see it done or do it yourself.

We believe that this partnership will do more to minimize alignment problems, reduce develop-  
ment costs, increase flexibility, encourage experimental design changes, and improve prototype  
precision than anything you have ever used before.

Price and all other details free upon request. Send for our  
Bulletin No. 500N. A postcard will do.
