Gaertner Rectangular Flat-Bed Optical/Instrument Benches now in two sizes: extra-large 4'x6', and 3'x4'

New R532 4'x6' Flat-Bed ROB. Shown with Mod II Holography System.

Our new 4'x6' (122cm x 183cm) flat-bed ROB gives you an extra-large working surface for unusual versatility. Its frameless antivibration air suspension housing frees the total bench-top surface for set-up use. It provides a full 122cm x 183cm flat working surface allowing you to make larger, more extensive set-ups with complete flexibility in any direction. Components may even overhang the edges of the bench.

You can use most Gaertner standard optical bench accessories and component assemblies, including magnetic holders and our new low-cost liquid plateholder for real-time holography (shown in photo below.) Stability is assured by the special high density slab base and the proven antivibration air suspension system. The surface has an exceptionally durable low-friction finish.

R432 Mod II Holography System plus R274 Liquid Plateholder.

Except for size, our 3'x4' (91.5cm x 122cm) ROB is identical to its 4'x6' companion described above.

Gaertner's new, inexpensive liquid plateholder for real-time holography provides a simple, economical means of comparing a holographic image with the actual object.

Tunable diode laser instruments from the technology originators

Laser Analytics, Inc., the company whose founders developed the technology, now offers you a family of infrared analytical spectroscopy instruments based on tunable diode lasers. Features include 0.0001 cm⁻¹ resolution, rapid spectral scanning, and complete spectral coverage between 2.7 and 33 micrometers.

Actually a new class of analytical instruments which provide precision measurements

never before possible, tunable diode laser instruments are used in ultra-high resolution spectroscopy, laser photochemistry, isotope separation, pollution monitoring, process control, heterodyne radiometry, infrared detector characterization, and other applications. For complete information, write Laser Analytics, Inc., 38 Hartwell Avenue, Lexington, Massachusetts 02173. Or phone 617-862-0884.

the first CAMAC nuclear ADC

Now there's a 4096-channel nuclear ADC for CAMAC-

one that gives you high resolution, Wilkinson-rundown design for continuous differential linearity, and all of these other features and functions in one single-width CAMAC module:

☐ Buffer amplifier ☐ Linear gate ☐ Sample and hold peak ☐ Derandomising eight-conversion buffer memory ☐ Adjustable threshold ☐ Fast conversion and fast restore

NEI's Model 9060 Nuclear ADC gives you on-line control of the number of channels, back bias, conversion mode, conversion readout (via dataway or front panel connector), conversion factor, and coincidence mode.

Model 9060 has ± 5 -volt or 0-10-volt dynamic range. Conversion time is $5.7 \mu\text{s}$ for 256 channels; maximum $53.7 \mu\text{s}$ for 4096 channels.

Air-Operated Ball Valves

WHITEY Air Operated Ball Valves provide remote full flow switching, control or on-off service...rapidly and reliably in a wide variety of system applications.

- Compact air operators available in Double Acting and Spring Return models
- Can be operated from standard shop air, or instrument air supplies
- Sturdy die cast aluminum alloy housing is precision machined for reliability and long cycle life
- Mounting bracket allows installation in any position, with unit weight off piping or tubing
- Valve sizes from 1/8" to 1" with SWAGelok or pipe ends
- Air operators available for both top loaded and swing-out models
- IMMEDIATELY AVAILABLE FROM LOCAL STOCKS

Severe Service Valves

WHITEY "NB" Series Union Bonnet Valves provide shut-off or regulating service at pressures to 6000 psi, temperatures to 450° F, in corrosive and high purity systems.

- Choice of stem types— non-rotating ball, TFE or regulating tips • Rugged 3-piece union bonnet construction—316 stainless steel • TFE packing below threads — no washout of thread lubricant, system contamination, or need for adjustment • Safety back seat
- Straight and angle patterns • Variety of orifice sizes • SWAGelok and female pipe ends 1/8" to 3/4" • IMMEDIATELY AVAILABLE FROM LOCAL STOCKS
