LAKE SHORE CRYOTRONICS is The Answer For all of your CRYOGENIC NEEDS!

Full Range Cryogenic Thermometers/Controllers DRC-7C & DRC-70C

DRC-7C

- 1 to 400K Range • 1K Resolution*
- Recorder Output & Optional BCD Input/Output • Interchangeable Sensors
- Solid State Construction & Reliability
- 0.5K or Better Controllability*
- 0 to 50 Watt Heater Output

DRC-70C

- * 0.1K Resolution
- * 0.1K or Better Controllability

Models DRC-7C & DRC-70C offer the convenience of Direct temperature read-out and set point selection in Kelvin units with a choice of readout resolution and controllability.

The unique design and the use of completely interchangeable sensors alleviates the necessity of instrument recalibration when sensors are changed, thus allowing one to dedicate a sensor, but not the instrument to a specific system.

The full range capability of these instruments, coupled with 0 to 50 watts of heater power make the DRC-7C and DRC-70C the ideal solution to a multitude of temperature control problems.
