

phic advances to medicine, biology and engineering. There are also photographic portraits of many of the men and women who figure in the histories.

new books

History, Philosophy, Society & Government

Seeds of Promise: The First Real Hearings on the Nuclear Arms Freeze. R. Forsberg, R. L. Garwin, P. C. Warnke, R. W. Dean. 213 pp. Brick House, Andover, Mass., 1983. \$9.95

Nuclear Power Hazard Control Policy. J. C. Chicken. 272 pp. Pergamon, New York, 1983. \$15.00

Physics and Contemporary Needs. Proc. Fifth International Summer College, June 1980, Nathiagali, Pakistan. Riazuddin, A. Qadir, eds. 626 pp. Plenum, New York, 1983.

Abusing Science: The Case Against Creationism. P. Kitcher. 213 pp. MIT Press, Cambridge, Mass., 1983. \$6.95 paper

Academic Renewal in the 1970s: Memoirs of a City College President. R. E. Marshak. 280 pp. University Press of America, Washington, DC, 1983. \$23.25 cloth, \$11.25 paper

Peer Commentary on Peer Review: A Case Study in Scientific Quality Control. S. Harnad, ed. 71 pp. Cambridge U. P., New York, 1983. \$12.95. *compendium*

The Cult of the Atom: The Secret Papers of the Atomic Energy Commission. D. Ford. 273 pp. Simon & Schuster, New York, 1983. \$13.95

What's Wrong With Our Technological Society—And How to Fix It. S. Ramo. 280 pp. McGraw-Hill, New York, 1983. \$19.95

The Wizards of Armageddon. F. Kaplan. 452 pp. Simon & Schuster, New York, 1983. \$18.95. *history of defense policy*

No More War! Twenty-fifth Anniversary Edition. L. Pauling. 304 pp. Dodd, Mead, New York, 1983. \$7.95

Relativity and Geometry. R. Torretti. 395 pp. Pergamon, New York, 1983. \$45.00

The Nuclear Era: Its History; Its Implications. C. G. Jackson. 143 pp. Oelgeschlager, Gunn & Hain, Cambridge, Mass., 1983. \$20.00

UFOs: The Public Deceived. P. J. Klass. 310 pp. Prometheus, New York, 1983. \$17.95

Nuclear Power and Nonproliferation: An Interdisciplinary Perspective. W. C. Potter. 281 pp. Oelgeschlager, Gunn & Hain, Cambridge, Mass., 1983. \$25.00 cloth, \$9.95 paper

Nuclear Inc.: The Men and Money Behind Nuclear Energy. M. Hertsgaard. 339 pp. Pantheon, New York, 1983. \$16.95

Frame of the Universe: A History of Physical Cosmology. F. Durham, R. D. Purrington. 284 pp. Columbia U. P., New York, 1983. \$24.95

JPL and the American Space Program: A History of the Jet Propulsion Labora-

tory. C. R. Koppes. 299 pp. Yale U. P., New Haven, Conn., 1982. \$19.95

Theory and Mathematical Physics

The Elements of Mechanics. G. Gallavotti. 575 pp. Springer-Verlag, New York, 1983. \$48.00. *undergraduate text*

Structure of Complex Turbulent Shear Flow. International Union of Theoretical

and Applied Mechanics Symposium, Marseille, France, August-September 1982. R. Dumas, L. Fulachier, eds. 444 pp. Springer, New York, 1983. \$39.00

Quantum Theory of Magnetism. Second Edition. R. M. White. 282 pp. Springer-Verlag, New York, 1983. \$30.00

Variational Calculus with Elementary Convexity. J. L. Troutman. 365 pp. Springer-Verlag, New York, 1983. \$29.80. *undergraduate text*

TRANSIAC ANNOUNCES PERSONALIZED SIGNAL PROCESSING

Combining the power of IBM'S® XT Personal Computer and TRANSIAC'S extensive line of CAMAC modular signal processing instruments, the PSP 1 Data Acquisition System bridges the gap between these two major forces now influencing data acquisition in the research and development fields.

The PSP 1 gives you: ■ **MODERN 16-BIT PERSONAL COMPUTER SYSTEM** including up to 640 Kbyte memory, a 10 Mbyte Winchester, 360 Kbyte floppy, graphics, hardware arithmetic, expansion slots.

■ **CAMAC SIGNAL PROCESSING PLUG-INS**, ranging from 100MHz transient recorders to instrumentation preamplifiers to signal averagers. Full support for high-speed DMA transfer and multi-crate operation.

■ **POWERFUL SOFTWARE PACKAGE** with graphics and CAMAC I/O support, BASIC or FORTRAN, and IBM® DOS 2.0 operating system and utilities. ■ **THE AFFORDABLE SOLUTION TO YOUR APPLICATION** in ultrasonics,

fast chemical kinetics, plasma diagnostics, spectroscopy, Lidar, explosives testing, or other R&D area.

More details on a partial or complete configuration are available by calling or writing to TRANSIAC Corporation, 2375 Garcia Avenue, Mountain View, California 94043, (415) 969-0151.

IBM is a trademark of International Business Machines Corporation.

The Tides of the Planet Earth. Second

COLLIMATION puts radiation on the straight and narrow...

Alpha, Beta and Gamma radiation . . . only a high precision collimator will enable you to dictate the percentage and orientation of rays allowed to pass to a specific area of interest. Luckily, Collimation offers that needed precision. As a leading innovator in nuclear medicine for over ten years, Collimation's superior manufacturing and R&D capabilities are now available to physicists involved in a variety of radiation applications.

Special Designs—As an integral part of your equipment, the collimator must be constructed to your specifications. Special design requests represent the majority of Collimation's business.

COLLIMATION, INC.

21 Sherwood Lane, Fairfield, New Jersey 07006 (201) 575-9598

With materials ranging from lead to stainless steel and hole diameters from .010" to .125", Collimation offers the flexibility that your design requires.

Precision Instrumentation—As a physicist, careful attention to detail and accuracy does not stop short of the collimator. Like all types of radiation instrumentation, the collimator must be held to the tolerances required for accurate detection or measuring.

Collimation's manufacturing and quality control techniques keep specifications as close as $\pm .0001$ ". No other company in the industry can make such a claim.

So if you're looking to put radiation on the straight and narrow, look to the leader of collimator design and innovation.

Call or write for further information.

Our photon counting systems even help you count pennies.

PRA photon counting systems are the least expensive on the market—\$500 to \$2,000 less than other systems.

But don't let the low price fool you. Our systems offer everything the others do. And more.

Look at what you get. A pre-amplifier with a gain of $\times 10$ or $\times 100$ and a system gain of 10–10,000.

A leading edge discriminator with a frequency response of 100 MHz and continuously adjustable threshold from

–10mV to –300mV.

A dual channel counter which counts rates up to 100 MHz and has a variety of useful output formats.

And here's something extra—computer interface capabilities.

Our system has a data coupler module with IEEE 488, RS232, 20mA current loop and standard parallel interfaces.

Send for literature. PRA, 100 Tulsa Road, Oak Ridge, Tennessee 37830, or call (615) 483-3433.
