

Bohr worked closely with an extraordinarily large number of scientists; reading this lively account will not only give us insight into the life of a great scientist, but will also elucidate the development of physics during the first half of this century. —AH

CRYOSYSTEMS

Your CRYOGENIC CONNECTION

announces

AT LAST

A 4.5 K Closed Cycle Refrigerator System Under \$25,000.00

- Laboratory Size and Industrial Quality
- 1/4 Watt at 4.5 K

Model LTS-21-H, Temp.

For:

- Helium Reliquefiers
- Detector Cooler
- Low (or no) Boiloff Dewars

OPTIONAL FEATURES:

- Variable Temperature Control
- Optical Access
- Vibration Free Mounting

Cryosystems offers a full line of 4.5 K Closed Cycle Refrigerator Systems from 1/4 to 4 Watts with variable temperatures from 2.5 K to 300 K.

Also Available—FTIR, VSM, Mossbauer and Special IR Systems. We Custom Engineer to Your Needs.

To learn more about your CRYOGENIC CONNECTION write or call:

availability

The off-the-shelf ability to give you what you need... when you need it.
A fast answer to an urgent request.
In fact... 90% of all orders are shipped within three days... 70% within 24 hours!
That kind of availability.
You get it best at Huntington because...

We care.

new

Innovative Design Provides Longer Life for Rotary Feedthroughs

When You Need: Longer life expectancy, higher speeds and torque limits. All are now achieved by departing from the usual bent-shaft, wobble action design.

• Model VF-164 (shown): torques up to 10 ft-lbs, tested for over 3,000,000 cycles at speeds from 0-2000 rpm.

• Model VF-161: up to 350 inch-ounces of torque, tested for over 5,000,000 cycles at speeds from 0-3000 rpm.

new

Rota-Port Feedthrough

When You Need: A differentially pumped, rotatable, ultra-high vacuum mounting base for any flange-mounted source.

new

Ang-U-Linear Feedthrough With Grabber Jaw

When You Need: To pick-up and reposition samples or other objects within the vacuum chamber. The device is sealed with a series of welded bellows, has a linear stroke of 4½" and angular motion describing a 45° included angle.

It's all in here. Everything from specifications to pricing. It's our 186-page catalog, *available now* and free for the asking. Call: toll free (800) 227-8059, or in California .. (415) 964-3323.

When You Need More Than One... COUNT on US

Multichannel Counter/Timer with RS232 Interface

Our new modular COUNTER/TIMER performs accurate frequency, timing and totalizing measurements for multichannel applications. The flexible RS232 interface means easy interfacing to computer, printer or virtually any acquisition and control system.

The Model 4604 features four 125 MHz channels, each having an 8-decade Liquid Crystal Display (LCD). The modular concept allows our instruments to match your application. Up to six modules or

24 channels may be plugged into a rugged instrument housing.

This COUNTER/TIMER even functions as a multichannel DIGITAL RATEMETER with sampling intervals from 100 μ sec to days.

The Model 4604 COUNTER/TIMER/RATEMETER joins a broad family of instruments for high-speed laboratory and industry process control that is designed to be integrated into a computer environment. For more information, call or write us today.

Cryogenic Systems

AT TRI Research we believe that the whole is greater than the sum of its parts. Provided of course that each part is complete in itself.

Our systems include open and closed cycle refrigerators, temperature sensors and instrumentation, not to mention total applications support and documented performance.

No other systems provide such complete control. TRI Research can provide it all to you.

T-2000 Cryo Controller

The most accurate, stable and dependable cryogenic temperature controller of its type. Extremely easy to use with readout and control directly in temperature for all sensor types and continuously adjustable heater power range. Full IEEE-488 compatibility and four sensor inputs facilitate complete automation.

Cryo Cal™ Sensors

Since 1965 the name most often identified with the highest quality cryogenic temperature sensors for university, government and industry users. Complete range of sensor types, including Cryo Carbon™ diode, germanium, platinum RTD and specials. NBS traceable calibrations, 11th order polynomial fits and GenAB interpolation tables available.

Application Support

We have dedicated ourselves to helping you achieve important new results in your work. We feel that your measurement must form the basis for a configuration of apparatus specific to your needs. That is why we stand ready to specially design as little or as much of your system as appropriate. We can supply you with turn-key systems complete with applications software. Complete cryogenic engineering consulting services available.

Supplies

CS-1000B Constant Current Source, wire, hermetic connectors, thermal interface materials ... many hard to find items are available from TRI Research together with the knowledge required to use them properly. Just ask for our catalog.

Our products are in use at virtually every major center of cryogenic activity in the world. Contact TRI Research and let us help you turn your next idea into a result.

T·R·I RESEARCH
AUTOMATED CRYOGENIC SYSTEMS

Treatise on Heavy-Ion Science, Vol. 3: Compound System Phenomena. D. A. Bromley, ed. 589 pp. Plenum, New York, 1985. \$89.50. *Compendium*

Treatise on Heavy-Ion Science, Vol. 4: Extreme Nuclear States. D. A. Bromley, ed. 701 pp. Plenum, New York, 1985. \$92.50. *Compendium*

Treatise on Heavy-Ion Science, Vol. 6: Astrophysics, Chemistry, and Condensed Matter. D. A. Bromley, ed. 429 pp. Plenum, New York, 1985. \$69.50. *Compendium*

Treatise on Heavy-Ion Science, Vol. 7: Instrumentation and Techniques. D. A. Bromley, ed. 471 pp. Plenum, New York, 1985. \$79.50. *Compendium*

Quantum Electronics and Lasers

Analytical Laser Spectroscopy. NATO ASI Series. Proc. Ninth Annual Course of the International School of Quantum Electronics, Erice, Italy, September-October 1982. S. Martellucci, A. N. Chester, eds. 290 pp. Plenum, New York, 1985. \$52.50

Fundamentals of Laser Interactions. Lecture Notes in Physics 229. Proc. Seminar Obergurgl, Austria, February-March 1985. F. Ehlotzky, ed. 314 pp. Springer-Verlag, New York, 1985. \$20.50

Gas Flow and Chemical Lasers. Proc. Symp. Stresa, Italy, September 1983. M. Onorato, ed. 773 pp. Plenum, New York, 1984. \$115.00

Miscellaneous

Abstracts and Indexes in Science and Technology. Second edition. D. B. Owen. 235 pp. Scarecrow, Metuchen, N.J., 1985. \$17.50

Explosive Shocks in Air. Second edition. G. F. Kinney, K. J. Graham. 269 pp. Springer-Verlag, New York, 1985. \$39.00. *Monograph*

Fortran Optimization. Revised edition. M. Metcalf. 253 pp. Academic, New York, 1985. \$26.00. *Text*

Effective Fortran 77. M. Metcalf. 231 pp. Clarendon, Oxford, (US dist. Oxford U.P., New York) 1985. \$15.95. *Manual*

Introduction to Magnetic Recording. R. M. White, ed. 309 pp. IEEE Press, New York, 1985. \$47.50. *Compendium*

Masters Theses in the Pure and Applied Sciences, Vol. 28. W. H. Shafer, ed. 300 pp. Plenum, New York, 1984. \$85.00

Sharing Research Data. S. E. Fienberg, M. E. Martin, M. L. Straf, eds. 225 pp. National Academy, 1985. \$17.50. *Report*

The Directory of Consultants in Lasers and Physics. 256 pp. Research Publications, Woodbridge, Conn., 1985. \$85.00

The Elements of Graphing Data. W. S. Cleveland. 323 pp. Wadsworth, Monterey, Cal., 1985. \$18.95.

The Encyclopedia of Physics. Third edition. R. M. Besancon, ed. 1378 pp. Van Nostrand Reinhold, 1985. \$149.50

Auditory Biochemistry. D. G. Drescher, ed. 519 pp. C. C. Thomas, Springfield, Ill., 1985. \$64.50. *Compendium*

Circle number 64 on Reader Service Card
