CRYOGENICS ALL THE TOOLS YOU'LL EVER NEED

Reliable, useful cryogenic equipment from Air Products is indispensable to the researcher working at low temperatures.

HELI-TRAN® open-cycle coolers are a simple-to-use source of refrigeration from below 2K to 300K.

DISPLEX® closed-cycle refrigerators provide reliable, continuous-duty cooling from 10K to 450K.

HELIPLEX™ closed-cycle refrigerator is a liquid-cryogen-free source of continuous cooling from 3.7K to 300K.

DISPLEX® cryopumps and LN₂-free cold traps offer clean, fast vacuum.

And... Air Products has the most complete line of accessories vital to spectroscopy, ESR, DLTS, NMR, matrix isolation, Hall effect, and other low-temperature research.

HIGH VOLTAGE POWER SUPPLIES

When high stability of output is critical, and accurate controls are a must, look to Kevex for your power supply solution.

The new Kevex series of power supplies offer:

- Independent adjustable target current and voltage.
- Pre-set current and voltage capabilities.
- Output voltage from 30kV to 80kV.
- Maximum output power to 300 watts.
- Front panel control or digital remote programming.
- Standard and custom designs.

Our expertise includes x-ray source and laboratory power supplies.

QUADRUPOLE GAS ANALYZER

COMPLETE INSTRUMENT

\$4995.00

(MADE IN U.S.A.)

Now Available with Particle Multiplier

STANDARD FEATURES

- 1-100 AMU
- Faraday Cup Detector
- Dual Filaments
- 100% Front Panel Control
- 12" High Resolution Display
- Graph or Tabular Data Display
- RS232 Computer Interface
- 10^{-4} to 5×10^{-12} Torr Pressure Range
- Background Subtraction

OPTIONAL FEATURES

- Pressure vs. Time Display
- 1-200 AMU
- Graphics Printer For Hard Copy
- Sample System For Higher Pressures

With Dycor's Quadrupole Gas Analyzer you will no longer have to guess about what's in your Vacuum System. A glance at the screen will tell you exactly what is there. Our engineers would be happy to discuss your application.

Thermoelectric PMT Chamber

(Includes power supply)

Fully-Wired Tube Socket Assembly (for all standard PMTs). Double-Pane, Non-Fogging Window and Front-Mounting Adapter. Model TE-182TSRF Air-Heat exchanged chambers provide reliable, high-quality cooling with excellent portability and flexibility. Design of this economical system is based on the widely used Products for Research Model TE-104. Model TE-182TSRF accepts 2" diameter or smaller end-on PMTs. Model TE-212TSRF accepts side window tubes.

Series 85 MCA . . . Performance You Can Depend On

Based on our customer service records, the Series 85 MCAs are operating at an incredible mean time between failure rate of almost three years. Not bad for a sophisticated multichannel analyzer. But in addition to its reliability, the Series 85 is built to perform. Take a look at some of the features:

- Handles up to 16 inputs
 - Crisp, 30 cm (12 in.) diagonal CRT
 - Complete data manipulation and peak analysis firmware
 - Built in diagnostic testing routines
 - Computer interface available
 - Three NIM slots for front end modules
 - Optional qualitative and quantitative Isotopic Analysis
- Call or write today for additional details.

Janis Quality! SuperTran Cryostat Systems

These versatile cryostats combine a flexible transfer line with a cold finger sample mount and a variety of vacuum jackets.

They provide fast cooldown to 2 K, and smoothly vary the temperature to 300 K (600 K, optional) with excellent stability.

Complete systems are supplied with temperature sensors and automatic controllers, plus storage dewars and vacuum pump-in stations.

Please contact us with your requirement.
