

closely related research. The book contains two round-table discussions that also include historians of science such as Roger Stuewer and S. S. Schweber.

Leon Lederman writes in the foreword: "The symposium gave us an opportunity . . . to listen to the giants on whose shoulders we try to stand. The giants who lectured here also wrote the books we studied and established the physics upon which we base our work. . . . The style of their observations is our heritage."

HIGH VOLTAGE POWER SUPPLIES

When high stability of output is critical, and accurate controls are a must, look to Kevex for your power supply solution.

The new Kevex series of power supplies offer:

- Independent adjustable target current and voltage.
- Pre-set current and voltage capabilities.
- Output voltage from 30kV to 80kV.
- Maximum output power to 300 watts.
- Front panel control or digital remote programming.
- Standard and custom designs.

Our expertise includes x-ray source and laboratory power supplies.

For complete information write to:

J C Controls is known for a full line of reliable, long lasting & low cost nitrogen level controllers . . . and now an **ION GAUGE CONTROLLER (IG-5200)** with the following features:

- Bayard-alpert or UHV ion gauge tube operation
- Automatic Range Changing
- Computer interface (RS 232)
- Ion gauge set point
- Thermocouple set point
- Settable timed degas operation
- Automatic pressure tracking during pump down
