# Computerized Hall mobility system

Bio-Rad's turn key Hall mobility system combines simplified operations with impressive performance specifications. It takes just a few minutes to probe a patterned or alloyed sample, verifying contact quality and obtaining measurements of bulk or sheet resistivity, Hall mobility and carrier concentration.

Advanced features such as AC or DC measurement mode and auto optimization of measuring conditions assure high accuracy.

Find out more about this well-conceived system with its optional variable temperature cryostat and hot stage from:
