

crepancy given the theoretical and experimental uncertainties. Independent of the solar neutrino problem, prospective future experiments on neutrinos from the Sun can provide important information on the solar interior and the properties of neutrinos. This book should serve as the standard reference for this rapidly developing area of research for some time to come.

Get on the FAST TRACK with the TRAQ H Transient Digitizer

Are you working in:

- LASER Research
- Time of Flight Mass Spectroscopy
- Nuclear Magnetic Resonance
- Non-Destructive Testing
- Acoustic Emission
- LIDAR
- RADAR
- SONAR

Do you need:

- 5 nsec Time Resolution
- Record Lengths from 16k bytes to 1 Megabyte per Channel
- Signal Averaging
- Complete Programmability
- Standard Interfaces
 - CAMAC IEEE 583
 - IEEE 488
- Pre-Trigger Data Acquisition
- Battery Backed Memory for Data and Setups

The TRAQ H system enables you to acquire fast transients with a system configured for your application. Configure a single channel system with as little as 256k bytes of memory, expandable to 512k, 768k, or even 1 Megabyte of memory at any time. Each TRAQ H system controller can address two TRAQ H digitizers. Add another channel without adding another TRAQ H controller. Completely control the recording process with the PSP9200 software. Or convert the whole system to a high speed signal averager by adding an averager memory. Convert it back just by disconnecting the averager memory.

NEW

MODEL LTS-22-MAC CLOSED CYCLE Materials Analysis Cryostat

This versatile, new system has been designed to satisfy new requirements generated by the recent discovery of the exciting new group of "High Temperature Superconducting Materials."

- For Hall Effect, resistivity, Meissner measurements, etc., from <15 to 350 K.

GREATER ACCURACY

- Separate temperature sensors for control and sample readouts.
- Analog heater output from Series 4000 Temperature Controller gives superior control at low temperatures.
- Exchange gas sample environment virtually eliminates sample temperature gradients.

GREATER SPEED

- Easy-to-operate sample space airlock valve.
- Quick select 3-way valve for sample space, vacuum or exchange gas.
- No need to shut down refrigerator or break main vacuum during sample change.
- Larger, 3/4" diameter sample space permits multiple samples.

GREATER RELIABILITY

- Proven Gifford-McMahon refrigerator technology.
- Lower self-induced vibration.
- 10,000 hour service interval.
- Rigorous quality control.

PLUS

- Matching Meissner coil system
- Custom sample probes.
- QUICK DELIVERY
- Water or aircooled compressor
- No liquid cryogenics

An industry first:

Break the picosecond barrier!

Now for the first time you can break the picosecond barrier with the advanced new Femtosecond Streak Camera (FESCA) from Hamamatsu.

That's right. Using a new streak tube and single sweep operation, the FESCA achieves time resolution as short as 600 femtoseconds.

Consider these outstanding features:

- Time resolution: better than 700fs (600fs typical).
- Choice of two spectral responses—300 to 850 nm or 350 to 1550 nm.
- Dynamic range of >40 (typical at highest resolution).

You can rely on the advanced new FESCA for analysis of ultra-fast light pulses. For complete information or an on-site demonstration, contact Hamamatsu Photonic Systems.

OPTICAL RAY TRACERS

for IBM PC, XT, AT, & PS/2 computers

BEAM TWO \$89

- for students & educators
- traces coaxial systems
- lenses, mirrors, irises
- exact 3-D monochromatic trace
- 2-D on-screen layouts
- diagnostic ray plots
- least squares optimizer
- Monte Carlo ray generator

BEAM THREE \$289

- for advanced applications
- BEAM TWO functions, plus:
- 3-D optics placement
- tilts and decenters
- cylinders and torics
- polynomial surfaces
- 3-D layout views
- glass tables

BEAM FOUR \$889

- for professional applications
- BEAM THREE functions, plus
- full CAD support: DXF, HPG, PCX, and PS files
- twelve graphics drivers
- PSF, LSF, and MTF
- wavefront display too
- powerful scrolling editor

EVERY PACKAGE INCLUDES 8087 & NON8087 VERSIONS, MANUAL, AND SAMPLE FILES
