NEW BOOKS

Acoustics

Acoustooptics and Applications. Proc. Sch., Sobieszewo, May 1989. A. Sliwinski,

P. Kwiek, A. Markiewicz, eds. World Scientific, Teaneck, N. J., 1990. 457 pp. \$78.00 hc ISBN 981-02-0028-5

Atomic and Molecular Physics

Methods for the Localization of Singularities in Solutions of Gas Dynamics Problems. E. V. Vorozhtsov, N. N. Yanenko. Springer-Verlag, New York, 1990. 406 pp. \$110.00 hc ISBN 0-387-50363-3

A NEW APPROACH TO SURFACE SCIENCE.

Burleigh's UHV Inchworm® Motor with the "controlled approach" to in-vacuum positioning.

People who do precision positioning inside high vacuum chambers are excited about Burleigh's UHV series, the first in-vacuum linear motor positioning system. Sample or probe positioning for surface science can now be accomplished without cumbersome mechanical feedthroughs. The UHV Series is designed for use in scanning tunneling microscopes,

Auger and ESCA spectrometers, scanning electron microscopes, etc.

- UHV compatible materials.
- In-vacuum operation with remote controller.
- No mechanical feedthrough or bellows.
- A small footprint makes it ideal for close quarters.
- True linear motion.
- Bakeout temperatures to 150°C.
- Micron resolution.

Call or write for more information on Burleigh's new Controlled Approach Systems, specifically for STM.

SpectraPro™ Series Triple Grating Monochromators

Low Selling Price...Packed with Features

These affordable, high throughput triple grating monochromators and spectrographs are built for performance and versatility. They communicate via RS-232 (IEEE-488 optional), so computer control, including remote grating indexing is easy.

So many features...so little money:

- Convenient Triple Grating Mount
- Remote Scan Control
- RS-232 Computer Control
- Flat Focal Plane for Array Detectors
- UV•VIS•IR Operating Range
- 275mm and 500mm Focal Lengths
- Wide Selection of Accessories
- Low Selling Price!

The NanoScope[®] AFM Atomic Force Microscope

Atoms on the Surface of Table Salt (NaCl)
fresh from the shaker at Digital Instruments

A New Era in Microscopy

Now both insulating and conducting samples can be imaged quickly and reliably with atomic resolution. This scan of table salt is an example: one of our new employees did it out of curiosity.

Only the NanoScope AFM offers you this kind of power and productivity – and only Digital Instruments protects your investment with a policy of satisfaction or your money back. Call today to discuss this new technology and to arrange for a scan of one of your samples at no charge.

LIQUID HELIUM, VAPOR OR CLOSED CYCLE REFRIGERATION CRYOSTATS IN 2,000 PROVEN CONFIGURATIONS.

Just tell us what you need. Liquid helium, vapor, closed cycle refrigeration, or superconducting magnet and VSM systems. We offer configurations in virtually any design: with sample sizes to 4", tails to 4', hold times to a year and windows for any application.

Janis is the only company that can meet all your laboratory cryogenic requirements with a full line of proven products, each of which is fully integrated and tested before shipping.

We're the only company with more than 10,000 units in the field,

a 28-year track record of quality and an impressive list of satisfied customers including: IBM, AT&T Bell Labs, Kodak, JPL, DuPont, GE, McDonnell Douglas and Hughes Aircraft.

Our applications engineers are standing by to provide solutions for your next cryogenic research project. Call today: (508) 657-8750. Or write for our free brochure.
