

the progressive disordering of the universe.

It often happens that the best reference books for a working physicist are freshman lectures by a gifted teacher: Witness the great success of the Feynman lectures. I think Lightman's book is very much in that same tradition, though less comprehensive. If you're going to take the "narrow but deep" approach to scientific literacy, you'd have a hard time finding a better exposition than that given by Lightman in this book. I recommend it highly both for scientific literacy classes and for physicists. Anyone who found Feynman's lectures helpful will probably get a great deal out of this book.

NEW BOOKS

Acoustics

Acoustics of Layered Media II: Point Sources and Bounded Beams. *Springer Series on Wave Phenomena 10.* L. M. Brekhovskikh, O. A. Godin. Springer-Verlag, New York, 1992. 395 pp. \$89.00 hc ISBN 0-387-52646-3. *Monograph*

Audition. P. Buser, M. Imbert (translated from the French by R. H. Kay). MIT P., Cambridge, Mass., 1992 [1987]. 394 pp. \$34.95 hc ISBN 0-262-02331-8

Five Lectures on the Acoustics of the Piano. A. Askenfelt, ed. Royal Swedish Academy of Music, Stockholm, 1990. 105 pp. \$23.00 pb ISBN 91-85428-62-0. *Compilation includes compact disk*

Modern Methods in Analytical Acoustics: Lecture Notes. D. G. Crighton, A. P. Dowling, J. E. Ffowcs Williams, M. Heckl, F. G. Leppington, ed. Springer-Verlag, New York, 1992. 738 pp. \$69.00 pb ISBN 0-387-19737-0. *Compilation*

Atomic and Molecular Physics

Atomic Spectra and Radiative Transitions. *Atoms and Plasmas 12.* Second edition. I. I. Sobelman. Springer-Verlag, New York, 1992 [1979]. 356 pp. \$54.00 pb ISBN 0-387-54518-2. *Monograph*

Chirality: From Weak Bosons to the α -Helix. R. Janoschek, ed. Springer-Verlag, New York, 1991. 246 pp. \$124.00 hc ISBN 0-387-53920-4. *Compilation*

Cluster Ions and van der Waals Molecules. B. M. Smirnov (translated from the Russian). Gordon and Breach, Philadelphia, 1992 [1983]. 279 pp. \$90.00 hc ISBN 2-88124-697-4

Dynamics and Mechanisms of Photoinduced Electron Transfer and Related Phenomena. *North-Holland Delta Series.* Proc. Conf., Osaka, Japan, May 1991.

N. Mataga, T. Okada, H. Masuhara, eds. North-Holland, New York, 1992. 567 pp. \$148.50 hc ISBN 0-444-89191-9

Electron Density Theory of Atoms and Molecules. N. H. March. Academic, San Diego, Calif., 1992. 339 pp. \$50.00 hc ISBN 0-12-470525-1

The Chemical Bond: Structure and Dynamics. A. Zewail, ed. Academic, San Diego, Calif., 1992. 313 pp. \$49.95 hc ISBN 0-12-779620-7. *Compilation*

Biophysics and Medical Physics

Biophysical Modeling of Radiation Effects. Proc. Wksp., Padua, Italy, September 1991. K. H. Chadwick, G. Moschini, M. N. Varma, eds. Adam Hilger, Bristol, UK (US dist. AIP, New York), 1992. 352 pp. \$110.00 hc ISBN 0-7503-0187-2

The Computational Brain. P. S. Churchland, T. J. Sejnowski. MIT P., Cambridge, Mass., 1992. 544 pp. \$39.95 hc ISBN 0-262-03188-4

Electrical Stimulation and Electropathology. J. P. Reilly. Cambridge U. P., New York, 1992. 504 pp. \$74.95 hc ISBN 0-521-41791-0

Neural Networks for Vision and Image Processing. G. A. Carpenter, S. Grossberg, eds. MIT P., Cambridge, Mass., 1992. 467 pp. \$55.00 pb ISBN 0-262-53108-9. *Compilation*

Macromolecular Crystallography with Synchrotron Radiation. J. R. Helliwell. Cambridge U. P., New York, 1992. 595 pp. \$165.00 hc ISBN 0-521-33467-5

Physical and Chemical Mechanisms in Molecular Radiation Biology. *Basic Life Sciences 58.* Proc. Conf., Woods Hole, Mass., September 1990. W. A. Glass, M. N. Varma, eds. Plenum, New York, 1992. 517 pp. \$125.00 hc ISBN 0-306-44110-1. *Compilation*

Toward a Practice of Autonomous Systems. Proc. Conf., Paris, December 1991. F. J. Varela, P. Bourgine, eds. MIT P., Cambridge, Mass., 1992. 515 pp. \$55.00 pb ISBN 0-262-72019-1

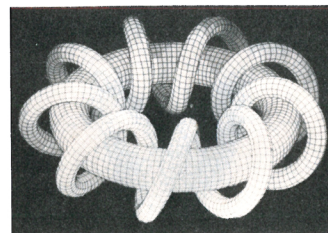

Cosmology and Relativity

The Early Universe: Facts and Fiction. Second edition. *Texts and Monographs in Physics.* G. Börner. Springer-Verlag, New York, 1992. 462 pp. \$59.00 pb ISBN 0-387-54656-1

Gauge Gravitation Theory. G. Sardanashvily, O. Zakharov. World Scientific, River Edge, N. J., 1992. 122 pp. \$38.00 hc ISBN 981-02-0799-9

Gravitation and Modern Cosmology: The Cosmological Constant Problem. *Ettore Majorana International Science Series 56.* A. Zichichi, V. D. Sabbata, N. Sánchez, eds. Plenum, New York, 1991. 228 pp. \$79.50 hc ISBN 0-306-44054-7. *Compilation*

Gain speed in your problem solving and confidence in your answers with Maple V...

3-D Tube Plot created with Maple V.

The symbolic math software for engineering, science, and education professionals.

Maple, developed at the University of Waterloo, is today's most complete symbolic math package, and it's now available from MathSoft, the makers of Mathcad. Maple's comprehensive library of over 2,000 built-in functions and easy-to-use interactive environment delivers a maximum strength program in a surprisingly uncomplicated package.

- **Provides power and flexibility.** You won't believe that something so powerful runs on everything from supercomputers to computers with as little as 1MB of memory. And Maple's flexibility makes it easy to share files across all platforms. It's completely programmable... and Maple's user interface supports natural mathematical calculations, so you can request an infinite variety of computations and graph your output in two or three dimensions.
- **Use for a wide range of applications.** Maple is ideal for a wide range of applications, including helicopter blade design, VLSI design, chemistry, satellite guidance systems, econometrics, electrical engineering, and applied mathematics — to name just a few. Maple frees you from the "bookkeeping" of complex calculations and lets you concentrate on modeling and problem solving.

CHAOTIC DYNAMICS WORKBENCH

Roger W. Rollins
Ohio University

CHAOTIC DYNAMICS WORKBENCH enables students to perform numerical experiments on time dependent nonlinear systems that evolve continuously in time and exhibit deterministic chaos.

Students can investigate the period-doubling route to chaos, strange attractors, sensitive dependence, Lyapunov exponents, and fractal dimensions.

Includes 100-page User's Manual.

Requires an IBM PC with at least 512K memory and CGA graphics. EGA or VGA graphics, math coprocessor and graphics-capable printer are recommended.

Niobium dc SQUID sensors

Conductus now offers you low-noise dc SQUID sensor chips that can be incorporated into your own experiments, probes, instruments, and systems.

FEATURES:

- All-refractory Nb/AIO_x/Nb process
- On-chip modulation coil
- Integral washer damping resistor
- Noble metal contact metallization
- Flux noise < 10 $\mu\Phi_0/\sqrt{\text{Hz}}$
- Compatible with standard SQUID electronics
- A variety of standard designs available
- Ask about rf SQUIDS, custom designs of SQUID arrays and gradiometers on substrates up to 4-inches in diameter.

**IN STOCK NOW
PRICE: \$500**

time-of-flight mass spectrometry

- High Collection Efficiency
- Simple Operation
- Unlimited Mass Range
- No Magnetic Fields

Comstock offers Time-of-Flight Mass Spectrometers utilizing either laser ionization or electron impact ionization. Source region is typically operated near ground potential, simplifying electronics. 50 ohm impedance-matched microchannel plate detector minimizes ringing for increased resolution and dynamic range. Power supplies, detection electronics, software, and vacuum chambers are available. **Ideally suited for surface analysis, laser desorption studies, multiphoton ionization, electron impact TOF, and laser ablation TOF.**

The Quantum Physics of Atomic Frequency Standards

Jacques Vanier, Conseil National de Recherches, Canada
Claude Audoin, Centre National de la Recherche Scientifique, France

Two-volume set, 1588 pages, hardcover
Illustrations, references, index
ISBN 0-85274-434-X \$550.00 **Member price \$440.00***

Institute of Physics Publishing, distributed in the U.S. and Canada by the American Institute of Physics

A complete synthesis that opens new avenues for researchers, this two-volume reference offers a theoretical and practical analysis of the operations of numerous atomic frequency standards. The authors discuss the standards' operations, exploring their impact on navigation and communication systems in industry, technology, and fundamental research. They provide all the information required to understand the theory and behavior of atomic frequency standards—and for building actual devices. This comprehensive project contains new data and tables of experimental and theoretical results for ready reference.

"Covers its subject so comprehensively, so connects physical theory and atomic clock technology, that it will be as indispensable to the expert as to the novice."
— Paul Forman, Science
