## APRIL 1993

- 1-3 The Creative Process in Sci and Art** Stony Brook, NY *Contact:* Lester Paldy, Ctr for Sci, Mathematics and Tech Education, Harriman Hall, Rm 202, State Univ of New York, Stony Brook, NY 11794-3733
- **3-8 Protein Folding and Stability** Sitges, Spain *Contact:* ESF
- **3-8 Biophys of Cytoskeleton** Giens, France *Contact:* ESF
- 4-8 Low-Energy Muon Sci** Santa Fe, NM *Contact:* LEMS 93, MP-VC, MS H831, LANL, Los Alamos, NM 87545
- 5-7 Sci and Tech in Third World Development** Glasgow, Scotland *Contact:* Richard Heeks, IDPM, Manchester Univ, Precinct Ctr, Manchester M13 9QS, UK
- 5-7 Ion-Beam and Surface-Specific Analysis Techniques** Namur, Belgium *Contact:* G. Demortier, LARN, Facultés Universitaires, N-D de la Paix, 22 rue Muzet, B-5000 Namur, Belgium
- 5-8 Global Warming Sci and Policy Intl Conf** Chicago, IL *Contact:* Sinyan Shen, Natural Resource Management Div, Supcon Intl, One Heritage Plaza, Woodridge, IL 60517-0275
- 5-8 Microscopy of Semiconducting Materials** Oxford, UK *Contact:* A. G. Culis, DRA Malvern, St. Andrews Rd, Malvern, Worcs WR14 3PS, UK
- 7-8 Ann Mtg of Natl Council on Radiation Protection and Measurements** Arlington, VA *Contact:* NCRP, 7910 Woodmont Ave, Ste 800, Bethesda, MD 20814-3095
- 12-15 APS/AAPT Joint Spring Mtg** Washington, DC *Contact:* APS

- 12-16 Opt Eng and Photonics in Aerospace Sci and Sensing** Orlando, FL *Contact:* SPIE PO Box 10, Bellingham, WA 98227-0010
- 12-16 MRS Spring Mtg** San Francisco, CA *Contact:* MRS
- 13-16 Wear of Materials** San Francisco, CA *Contact:* Conf Secretariat, Conf Organizers in Medicine, Sci and Tech, PO Box 415, 1001 Lausanne 1, Switzerland
- 13-16 Intermag '93** Stockholm, Sweden *Contact:* John Nyenhuis, 1285 Electrical Eng Bldg, Purdue Univ, West Lafayette, IN 47907-1285
- 13-23 Phase Transitions and Relaxation in Sys with Competing Energy Scales** Geilo, Norway *Contact:* G. Jarrett, Institutt for Energiteknikk, POB 40, N-2007 Kjeller, Norway [*E-mail:* gerd@barney.ife.no]
- 14-16 Computers in Univ Phys Education** Sydney, Australia *Contact:* M. A. Oldfield, Sch of Phys A28, Univ of Sydney, Sydney, NSW 2006, Australia [*E-mail:* mao@physics.su.oz.au]
- 14-16 Ann Mtg of Seismological Soc of America** Ixtapa-Zihuatanejo, Mexico *Contact:* Prog Chair, c/o SSA, 201 Plaza Professional Bldg, El Cerrito, CA 94530
- 15-17 Grand Unification: From Quantum Ideas, Via Relativity to Cosmology** Stony Brook, NY *Contact:* Lester Paldy, Ctr for Sci, Mathematics and Tech Education, Harriman Hall, Rm 202, State Univ of New York, Stony Brook, NY 11794-3733
- 19-21 Intl Symp on Integrated Ferroelectrics** Colorado Springs, CO *Contact:* Alona Miller, ISIF Coordinator, Univ of

Colorado, PO Box 7150, Colorado Springs, CO 80933-7150

- **19-29 Spring Sch and Wksp on String Theory, Gauge Theory and Quantum Gravity** Trieste, Italy *Contact:* ICTP *Note revised title and dates*
- 20-23 Dense Z Pinches** London, England *Contact:* M. Coppins, Blackett Lab, Imperial College, London SW7 2BZ, England
- 21-23 Scanning '93** Orlando, FL *Contact:* Mary Sullivan, Scanning '93, PO Box 832, Mahwah, NJ 07430
- 21-23 3-D Conformal Therapy** St. Louis, MO *Contact:* Bahman Emami, Radiation Oncology Ctr, Mallinckrodt Inst of Radiology, 4939 Children's Pl, Ste 5500, St. Louis, MO 63110
- 22-28 Solar Emerging: The Reality** Washington, DC *Contact:* Amer Solar Energy Soc, 2400 Central Ave, G-1, Boulder, CO 80301
- 25-29 High-Level Radioactive Waste Management** Las Vegas, NV *Contact:* William Wells, Howard Hughes College of Eng, Univ of Nevada, 4505 Maryland Parkway, Las Vegas, NV 89154
- **26-30 Applied Rheology for Industrial Chemists** Kent, OH *Contact:* Carl Knauss, Chem Dept, Kent State Univ, PO Box 5190, Kent, OH 44242-0001
- 26-30 Wksp on Phys and Experiments with Linear  $e^+e^-$  Colliders** Waikoloa, HI *Contact:* Frederick Harris, Dept of Phys

## ADDRESS KEY

Addresses for some frequently listed organizations are given below.

**Please note:** Complete information is now given for all listings. New listings are marked ● and newly revised listings are marked ○. Addresses for frequently listed organizations are given in the accompanying table. The complete listings are coded as follows:

## INTRODUCING... Physics: CINEMA CLASSICS

### Classic Physics Presentations From Archival Films

#### Now Available On Videodisc

The original material was used to teach untold thousands of students. Now, this edited collection of over 250 presentations of physics principles is available on videodisc.

Developed by the American Association of Physics Teachers, as part of a National Interactive Media Project for Secondary Physical Science Courses funded by the U.S. Department of Education, Physics: CINEMA CLASSICS contains three double-sided CAV videodiscs and a bar code directory. Optional software is also available for both Macintosh® and IBM® PCs.

## Introducing e-Vap® 15 kW Constant High Voltage Switching Power Supplies

### A major advance in applied electron beam technology

e-Vap® all-solid state 6, 10, and 15 kW Power Supplies feature advanced high frequency switching technology for  $\pm 0.50\%$  current regulation,  $\pm 0.25\%$  voltage regulation, very low ripple, and fast arc recovery. With this performance, dielectric material evaporation and monolayer depositions become routine procedures. The rugged, air-cooled modular design allows control of up to three electron beam sources. Just plug-in and run.

Similar high frequency circuits in the Source Controller Module provide consistent control of emission current - all the way down to below 10 mA. The X-Y Sweep Module is the only variable frequency sweeper available that supplies constant current amplitude at up to 100 Hz. Overall efficiency of the assembly is a remarkable 85%. Weight is under 100 pounds. Only 17-1/4" of rack space is required. For more details, call 510-887-6100 or 1-800-443-8817 toll free outside Calif.

# Essential Reading Material For the Materials Scientist

## SUPERCONDUCTIVITY: Its Historical Roots and Development from Mercury to the Ceramic Oxides

Per Fridtjof Dahl, *Superconducting Super Collider Laboratory, Dallas*

The first truly comprehensive history of superconductivity—from the first studies in the late 19th century to the present. The book delves deeply into a largely undocumented early history, marked by H.K. Onnes's first successes with mercury in 1911 and extending to the onset of World War II. Encompasses the materials development of the fifties; the work that culminated in the BCS theory of the early sixties; and the important recent application of ceramic oxides.

1992, 400 pages, illustrated • 0-88318-797-3, hardcover, \$60.00

## PIEZOELECTRICITY

C.Z. Rosen, *GEC-Marconi Electronic Systems Corp.*,  
B.V. Hiremath, *AT&T Bell Laboratories*,  
and R.E. Newnham, *Penn State University*

Thirty-two major review papers guide you in preparing and choosing piezoelectric materials and assist you in designing signal processing devices. Coverage ranges from the mundane to the arcane—from the dimmer switch in your home to sonar on an attack submarine. Major sections explore measurements and standards and the derivation of piezoelectric coefficients and the equations of state for coupling mechanical, electrical, and thermal fields.

1992, 512 pages • 0-88318-647-0, hardcover, \$95.00

## COMPUTATIONAL METHODS IN CONDENSED MATTER: ELECTRONIC STRUCTURE

A.A. Katsnelson and V.S. Stepanyuk, *Moscow State University*,  
A. Szasz, *Eotvos University, Budapest*,  
and O.V. Faberovich, *Voronezh University*

Here is the first book to make accessible a large number of computational results previously known only by a few experienced practitioners. You'll find a comprehensive analysis of electron states, calculation methods for electronic structures, pseudopotential methods, and electron methods and functional theory designed to calculate physical properties.

## Amazing graphics made simple!

**Axum® is the fastest way to get from your data to a publication-quality graph.**

Axum delivers an unprecedented range of plotting and data analysis capabilities without sacrificing ease of use.

And, it's the only graphics package that lets you automate your work — from importing your data all the way to printing your graphs.

TriMetrix Inc. • 444 NE Ravenna Blvd  
Suite 210 • Seattle WA 98115

- Unparalleled speed and versatility
- **NEW!** Mouse support
- Interactively add and customize graph objects
- **NEW!** Create contours and 3D mesh plots from huge data sets
- State-of-the-art data editor
- **NEW!** Non-linear curve fitting
- Import Lotus, dBase, ASCII data
- Use with WordPerfect and Word
- Over 75 2D and 3D plot types

NEW, Industrial Strength

**DERIVE<sup>®</sup> XM**

for 386 & 486 based PCs with eXtended Memory

**DERIVE<sup>®</sup> XM** (eXtended Memory) is a computer algebra system designed especially for power users who need to do large symbolic math problems as well as heavy duty number crunching.

"Industrial strength" **DERIVE XM** operates identically to the original, menu-driven **DERIVE, A Mathematical Assistant** program. **DERIVE XM** provides the same features and functions, intelligently applying the rules of mathematics to solve symbolic and numeric problems in algebra, trigonometry, calculus, and matrix algebra. In addition, **DERIVE XM** can make use of up to 4 gigabytes (4 billion bytes) of extended memory.

**DERIVE XM** is a powerful tool for mathematicians, engineers, and scientists. It's easy to use, and the size of problems you can solve is limited only by your computer's memory and speed.

**DERIVE XM** requires a 386 or 486 based PC compatible computer with 2 or more megabytes of memory. The suggested retail price is \$375. Contact Soft Warehouse for a list of dealers.
