

great enthusiasm for the natural phenomena—not just the equations—that they study. I highly recommend this book. It will be much appreciated in an astrophysics community sated with conference proceedings but frequently starved for authoritative, up-to-date, graduate-level references like this one.

The Physical Review

THE FIRST HUNDRED YEARS

A Selection of Seminal Papers and Commentaries

Edited by H. Henry Stroke,
New York University

Revisit vital seminal research from the first hundred years of *The Physical Review* in this landmark book and CD-ROM package.

Each of the twelve chapters, introduced by an eminent physicist, represents a major subfield of physics. From elementary particles to condensed matter physics, this book includes 200 reprinted papers with over 1,000 papers available on the accompanying CD-ROM. Readers can search the CD-ROM and book for the historic work in their own fields, or find a well-organized tour of the key thinking in other disciplines.

Designed for researchers, professionals, teachers, students, historians, and interested general readers, *The First Hundred Years* is a vital reference for any scientific collection and an enduring tribute to the authors and editors of *The Physical Review* and *Physical Review Letters*.

CD-ROM System Requirements: 386 or 486 IBM-compatible PC, VGA or SVGA monitor, hard disk drive, CD-ROM drive supported by Windows, 5MB of free space, 4MB RAM, MS-DOS 3.3 or later, Windows 3.1 or later, Microsoft DOS Extensions (MSCDEX) 2.1 or later.

April 1995, 1-56396-188-1, cloth, 1,200 pages, illustrated, bound in CD-ROM (not sold separately) \$75.00 **Members \$60.00**
Members of AIP Member Societies may take a 20% discount.
