The Multipurpose Displex®

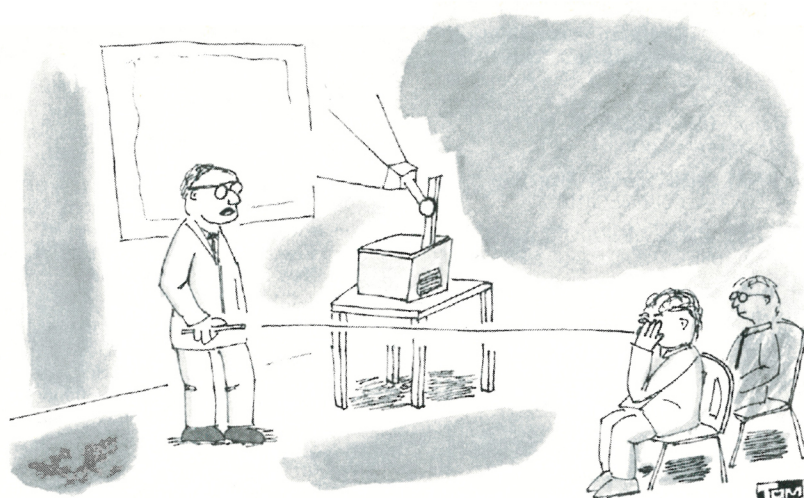

Using Standard Interfaces, you can Customize a Displex to many applications

for a wide variety of experiments such as spectroscopy, magnet and susceptibility studies, resistivity, or crystallography. With simple interface changes you can easily work on completely new applications while still benefiting from the outstanding performance and reliability of the original Displex system. With cooling capabilities of 4 - 800 Kelvin.

Displex is the standard in laboratory cryogenic systems.

REACH NEW HEIGHTS IN PRECISION HIGH VOLTAGE PERFORMANCE

- Catalog solutions for every high voltage application
- Custom solutions for the most demanding OEM requirements

Bertan has the high voltage power solutions for all your precision high voltage needs. Choose reliable technology that lets each of your applications reach new heights in high voltage performance. With nearly three decades of field-proven success, Bertan products deliver the precisely regulated high voltage with the low ripple needed for today's most demanding lab or OEM requirements. Choose Bertan expertise...the knowledgeable professional team that assists you long after the sale with dedicated customer support. Contact us today for our 100 page HV Reference Guide.

AT THE FOREFRONT OF ANALYTICAL TECHNOLOGY

Hidden Analytical is a global leader in creating unique scientific analysis and process control solutions used particularly in surface science, materials science and thin film technology.

QUADRUPOLE MASS SPECTROMETERS

Outstanding performance and precision for vacuum, gas, surface and plasma analysis.

PLASMA DIAGNOSTIC EQUIPMENT

Unsurpassed range of high sensitivity mass and energy analysers for ions, neutrals and radicals from plasma processes.

SURFACE / INTERFACE ANALYSIS

State of the art SIMS Probes and Ion Guns for surface analysis, UHV desorption studies and end-point detection in semiconductor processing.

GRAVIMETRIC ANALYSERS

A unique concept for the precise measurement of gas and vapour sorption.

Hidden Analytical's range of scientific instruments are at the forefront of our technology. Call, write or fax Hidden Analytical today to learn how these instruments can help you stay at the forefront of yours.

CONDUCTUS' pcSQUID system

represents a breakthrough in dc SQUID instrumentation technology. The advanced computer-controlled electronics brings the power of a PC and the flexibility of virtual instrumentation to SQUID control and data acquisition.

The heart of the system is the advanced Programmable Feedback Loop (PFL) that may be remotely configured for a wide variety of SQUIDs, both HTS and LTS. All SQUID drive signals are digitally controlled with high resolution by a personal computer.

The easy-to-use SQUID control software for Microsoft Windows™ gives the

user complete control over the full power and extensive features of the PFL. Single- and multi-channel interfaces are available for applications requiring one to 255 channels.

The Conductus family of advanced 77 K and 4.2 K dc SQUIDs and PC-based SQUID instrumentation form a modular system which may be easily integrated into a wide variety of applications.

ULVAC HELIOT Leak Detectors

are easy to operate with a hand held remote control that provides both digital and analog displays. Fast auto-zeroing and auto-calibration capabilities save time. Leak testing begins at 7.5 torr with an ultimate sensitivity of 1×10^{-11} std atm cc/sec.

Dry pumping options available.

MAGNETIC SHIELDING SOLUTIONS... Guaranteed!

Since 1965, Amuneal has developed the resources that have enabled us to become the technical leaders in the area of magnetic shield design and fabrication.

From engineering prototypes to high volume production runs, Amuneal **guarantees** the performance of each product we design.

No matter what your application demands, you can turn to Amuneal for solutions!

CHAOS

An
Interdisciplinary
Journal of
Nonlinear Science

Chaos brings you the most recent developments, speculations, and debates in nonlinear science from the international research community. Contributions to this peer-reviewed journal are gathered from diverse disciplines, including physics, mathematics, chemistry, biology, engineering, and the social sciences.

Published quarterly, **Chaos** offers you a broad spectrum of information in the form of original research articles, technical reviews, and pedagogical surveys. You'll also discover translations of key papers by Russian scientists and special "Focus" issues containing collections of related articles highlighting topics of current interest.

Subscribe now and see why **Chaos** is forcing a fundamental reassessment of the way in which we view the physical world.
