# High Voltage Power Supplies

The PS300 programmable power supply series provides up to 5kV at 25 Watts for laboratory and ATE applications. These supplies offer a wide range of features including programmable current and voltage limits, selectable overload response, and short circuit protection.

Dual LED displays monitor both output current and voltage, while a third display allows error-free front panel entry. A GPIB interface is available for ATE systems.

The combination of features, price and performance make the PS300 series the perfect choice for laboratory or systems use.

- PS350 0 to 5kV
- PS325 0 to 2.5kV
- PS310 0 to 1.25kV
- 25 Watts output power
- 0.001% regulation
- 0.1% accuracy
- Low output ripple
- Dual polarity
- Voltage and current readouts
- GPIB interface (optional)
