Rack clearance

28 ch
1GS/s

Multichannel GS/s data acquisition systems used to be expensive. They also would fill up entire instrument racks with power-hungry electronics. But no more. We have shrunk the size, lowered the cost, reduced the power consumption and incorporated exceptional features such as clock synchronization and complete trigger distribution.¹⁾

A single crate (no bigger than a desktop PC) can house up to 24 channels at 500MS/s or 1GS/s when deploying an embedded processor, or up to 28 channels

(14 at 2GS/s) using a PCI interface. Configurations start at \$11,990.²⁾

Cryogenics.

Cryogenic systems from the worldwide leader in vacuum and cryo technology.

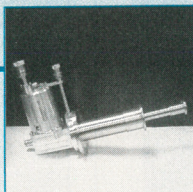

For critical cooling tasks in demanding environments, look to Leybold for worldwide service and efficient, reliable systems, including our innovative, compact Stirling Cooler and CoolPower 4.2K systems:

Stirling Cooler

Ideal for sample detector cooling, material research/testing, and spectroscopy.

- 6 watts @ 77K
- Low power consumption
- Fast cool-down
- Compact size

CoolPower 4.2K

Applications include superconductivity, MRI, high-energy physics, and SMES.

- Several cooling capacities available
- Long life, low vibration
- High output scroll compressors

CoolPower Cryopumps

- Several sizes available
- High pumping speed
- High capacity
- Fully automatic operation
