From this ... to this.

Your complete source for inspired hot-pressed BN.

Advanced Ceramics is your complete source for hot-pressed BN, whether simple shapes or complex machined configurations.

We offer:

- Large capacity to support your demands
- A variety of grades to meet your specific requirements
- Total machining capability
- *Hot pressed BN any way you can imagine!*

BN has several unique performance properties:

- Excellent electrical insulator and thermal conductor
- Thermal shock resistance
- Inorganic and inert

- No reaction to halide salts or many other reagents, even at high temperatures
- High purity and usefulness in vacuum

Scanning Probe Microscopes for under \$33K!

The microscopes are fully equipped including WaveMode™ (intermittent contact mode), Phase Mode, Video Subsystem, and up to 20 Hz scanning rates.

Now available with optional Magnetic Force Microscopy (MFM)

- Large sample capacity
- Fast image acquisition
- Easy-to-use hardware and software
- Fast and easy pre-mounted cantilever change
- Windows software environment
- Source code accessibility with research package

Images - top to bottom:

Epitaxial GaN on sapphire

High Voltage Power Supplies

The PS300 programmable power supply series provides up to 5kV at 25 Watts for laboratory and ATE applications. These supplies offer a wide range of features including programmable current and voltage limits, selectable overload response, and short circuit protection.

Dual LED displays monitor both output current and voltage, while a third display allows error-free front panel entry. A GPIB interface is available for ATE systems.

The combination of features, price and performance make the PS300 series the perfect choice for laboratory or systems use.

- PS350 0 to 5kV
- PS325 0 to 2.5kV
- PS310 0 to 1.25kV
- 25 Watts output power
- 0.001% regulation
- 0.1% accuracy
- Low output ripple
- Dual polarity
- Voltage and current readouts
- GPIB interface (optional)
