Was Einstein Wrong?

João Magueijo, a theoretical physicist at London's Imperial College, has a groundbreaking new theory that challenges Einstein's theory of relativity—and may forever change the way we look at the universe. In his extraordinary new book, Magueijo dares to challenge long established ideas—indeed the most sacred laws of physics. The story of a scientific quest like no other, *Faster than the Speed of Light* provides the first real glimpse of twenty-first-century physics.

“One of the more scathing scientific memoirs of recent years ...irresistible.”

Models XR-100CR and XR-100T-CZT are high performance X-Ray and γ -Ray detectors mounted on a thermoelectric cooler together with the input FET to the Preamplifier (A250). Monitored by an integrated circuit, these components are kept at -30°C and are enclosed in a hermetic TO-8 package with a vacuum tight, light tight Beryllium window.

Power and signal processing to the detector is provided by the PX2T in order to ensure quick, stable operation in less than one minute from power turn-on. The output pulse produced by the PX2T can be connected directly to the input of a Multichannel Analyzer (MCA). For optimum portability and versatility, use the Amptek MCA8000A "Pocket MCA."
