MuPAD[®] Pro

The Open Computer Algebra System

- Offers an integrated and open environment for symbolic and numeric computing
- Allows imperative, functional, and object-oriented programming
- Renderers for 2D and 3D plots offer animations, lighting, and improved interactive manipulation
- Uses OpenGL[®] to produce stunning 3D plots
- Allows animations to be saved as AVI files

Contains Scilab for fast numerical computations

ScientificWorkPlace...

MAXes™ - OLD WINE IN A NEW BOTTLE!!!

AMI has produced multi-axis superconducting magnets for years. Advancement in areas of nanotechnology and enhanced focus on spin-based physics (SPINTRONICS) has made MAXes™ (MULTI-AXIS) magnet systems even more interesting and challenging. The systems are custom designed for use with 3rd party inserts (He-3, Dilution Refrigerators, SPM, etc.). Opti-MAXes™ (Optical) and CF-MAXes™ (Cryogen-free) are new additions to the MAXes™ family.

- MAXes™ systems are available in 2-axis or 3-axis geometries. The 2-axis systems are offered with 9T/4.5T combination fields and 3T vector fields.
- MAXes™ systems provide a way of rotating magnetic field vectors at low temperatures without the need for complex sample manipulators.
- MAXes™ software enables control of the magnetic field vector at any angle.
