Residual Gas Analyzers from SRS are designed to handle the toughest environments from basic research to semiconductor process monitoring. Thousands of SRS RGAs are in use worldwide, and have earned us a reputation for producing quality vacuum instrumentation at reasonable prices.

Our RGAs have greater dynamic range, higher resolution and better linearity than competitive models, and are easier to use. In addition, a dual ThO₂Ir filament and a unique four channel electron multiplier give SRS RGAs a longer lifetime than other designs.

Simply put, SRS RGAs offer better performance and value than any other system.
