MODEL 54

CRYOGENIC IMPEDANCE BRIDGE AND TEMPERATURE CONTROLLER

Next generation 4-channel Impedance Bridge based on Cryo-con's proprietary Bi-phase Lock-in Detector chip set. Measures resistance, mutual-inductance and inductance. Ideal for use in Ultra-Low Temperature systems and Material Science measurements.

- High resolution color display, Capacitive touchscreen, Web 2.0, User programmable, Industrial automation protocols.
- Four input channels expandable to 28 via Ethernet distributed instrument connectivity.
- Each input supports diode, resistance and mutual-inductance thermometers. Four control loops add high precision temperature control.
