READ WHAT HAPPENED WHEN WE PUT OURSELVES IN THE "ENVIRONMENTAL TEST CHAMBER"

Both the Electronics and the Air Arm Divisions of the Westinghouse Electric Corporation are expanding. We need experienced electronic engineers for advanced design and development work . . . so we put ourselves in the "environmental test chamber" to see just what we have to offer the people we need.

We found that we have a professional atmosphere that is ideal for the engineer. We offer advanced study at company expense and merit promotions that assure a good future.

Our income and benefit advantages scored high on this test, too. Finally, there were many "extras," like the Westinghouse Patent Award Program, that make investigation of the current openings worthwhile for all electronic engineers.
