KNF LEAK-TIGHT PUMPS ALWAYS SAFER

Get the added safety of a backup system when handling hazardous and/or expensive gases and vapors. KNF LeakTight pumps offer ultra-low leak rates of $<6 \times 10^{-6}$ mbar L/sec and a safety back-up diaphragm, plus safeguards against intrusion contamination. Flow rates from 15 - 290 L/min. Options include explosion-proof motors and material choices. [Learn more.](#)

Gravitation's attraction, 50 years later

How has a massive textbook that has not been updated remained so relevant?

RYAN BARR

How contaminated water creates contaminated aerosols

Bursting bubbles can produce droplets with concentrated particulate matter. But the process is more complicated than previously thought.

RICHARD J. FITZGERALD

EDITOR'S SERIES

LIVE WEBINAR: THE PRINCIPLES OF DEEP LEARNING THEORY

Deep learning is an exciting approach to modern artificial intelligence that is based on artificial neural networks. The goal of this talk is to provide a glimpse—using tools from physics—for theoretically analyzing realistic deep neural networks. [Register now.](#)

FROM THE VAULT: MARCH 2003

Rosalind Franklin and the double helix

Although she made essential contributions toward elucidating the structure of DNA, Rosalind Franklin is known to many only as seen through the distorting lens of James Watson's book, *The Double Helix*.

LYNNE OGDEN ELGIN

Connecting physicists and engineers with the finest jobs.

PHYSICS TODAY JOBS

The nocturnal bird with ultrabright feathers

With the help of multiple reflectance-measuring elements, the Tawny woodhoopoe has brighter feathers than any other bird, according to a new study.

ANDREW GRANT

The rise and fall of beer foam

Simulations and experiments track the turbulent process of filling up a glass with beer at various temperatures and pressures.

HEATHER AL HILL

OCTOBER 2023

MARK YOUR CALENDAR: SPECIAL CAREERS ISSUE

The October 2023 issue of *Physics Today* will mark the fifth annual special issue focused on careers & recruitment. Don't miss out on the hottest jobs, career advancement advice, real insights from those in the field and special recruitment packages that deliver! [Learn more.](#)

LEARN MORE

FROM THE MARCH MAGAZINE

Splitting atoms together

Despite the 18½ cubic foot nuclear fission reactors on their nuclear knowledge, Norway and the Netherlands together were able to build a nuclear reactor several years after World War II ended.
